2 Maths Curriculum Intent, Implementation and Impact

Maths is essential to everyday life, critical to science, technology and engineering, and necessary for financial literacy and most forms of employment. A high-quality mathematics education therefore provides a foundation for understanding the world, the ability to reason mathematically, an appreciation of the beauty and power of mathematics, and a sense of enjoyment and curiosity about the subject.

Strategic intent

To **develop a curriculum which** develops lively, enquiring minds encouraging pupils to become self-motivated, confident and capable in order to solve problems that will become an integral part of their future.   The National Curriculum for mathematics aims to ensure that all pupils:

- become **fluent** in the fundamentals of mathematics, including through varied and frequent practice with increasingly complex problems over time, so that pupils have conceptual understanding and are able to recall and apply their knowledge rapidly and accurately to problems

- **reason mathematically** by following a line of enquiry, conjecturing relationships and generalisations, and developing an argument, justification or proof using mathematical language

- can **solve problems** by applying their mathematics to a variety of routine and non-routine problems with increasing sophistication, including breaking down problems into a series of simpler steps and persevering in seeking solutions.

Our Maths Curriculum focuses on 3 different types of knowledge:

- **Declarative knowledge** – I know that……..(facts and formulae moving onto the relationship between them)
- **Procedural knowledge** – I know how…….. (methods moving onto the relationship between facts, procedures and missing facts)
- **Conditional Knowledge** – I know when…….(different strategies moving onto the relationship between information, strategies and missing information)

Mathematics is an interconnected subject in which pupils need to be able to move fluently between representations of mathematical ideas. The programmes of study are, by necessity, organised into apparently distinct domains, but pupils should make rich connections across mathematical ideas to develop fluency, mathematical reasoning and competence in solving increasingly sophisticated problems. They should also apply their mathematical knowledge to science and other subjects. The expectation is that the majority of pupils will move through the programmes of study at broadly the same pace. However, decisions about when to progress should always be based on the security of pupils' understanding and their readiness to progress to the next stage. Pupils who grasp concepts rapidly should be challenged through being offered rich and sophisticated problems before any acceleration through new content. Those who are not sufficiently fluent with earlier material should consolidate their understanding, including through additional practice in 'Keep Up' sessions, before moving on.

Children deserve:

- To be set appropriate learning challenges
- To be taught well and be given the opportunity to learn in ways that maximise the chances of success.
- To have adults working with them to tackle the specific barriers to progress they face.

Implementation

Content and Sequence

A Maths Mastery approach is used to consolidate the building blocks that children need to study maths successfully and to a high level. There is a careful selection, sequencing and linking of declarative, procedural and conditional knowledge with a sequence of teaching and rehearsal which allows children to commit learning to their long-term memory. Children study mathematics daily covering a broad and balanced mathematical curriculum including elements of number, calculation, geometry, measures and statistics. Alongside daily maths sessions an additional 15 minutes a day is spent focusing on Fluent in Five (addition, subtraction, multiplication, division and fractions) and Rapid Reasoning to build fluency and precision in these areas and to think about numbers in a different way and how to address problems in the most efficient way. Due to the interconnected nature of mathematics, we aim to teach maths in a cross curricular manner as well as discretely to teach the practical application of mathematical skills. We focus not only on the mathematical methods but also focus on mathematical vocabulary and to use Maths Mastery to broaden and deepen mathematical understanding.

We aim for each child to be confident in each yearly objective and develop their ability to use this knowledge to develop a greater depth understanding to solve varied fluency problems as well as problem solving and reasoning questions. We use a range of textbooks, worksheets and online resources throughout the school to ensure a curriculum that is specific to each child's learning needs. Children complete their homework activities using the online homework resource Mathletics, which aims to build pupil engagement and consolidate maths knowledge.

As schools in England are required to administer an online multiplication tables check (MTC) to year 4 pupils we also use 'Times Table Rockstars' as an online and fun learning platform which also offer resources to be used in the classroom and also at home and helps to equip our children with times table fluency.

Within each aspect, children have the opportunity to acquire/refine, practise/apply, and extend/deepen their learning. Each level of challenge builds on prior learning and extends thinking. Component steps are intentionally planned and set out daily so learning is cumulative, to give all children the opportunity for deliberate practice and the tools to reach a greater depth standard when appropriate. Maths learning is built using the Concrete, Pictorial and Abstract approach to learning, where children visually grasp the mathematical concepts covered prior to applying this to abstract learning and then beyond to conceptual variation.

Teaching and Learning, Assessment and Feedback

Starting points are identified through accurate teacher assessment, prior learning and/or as a result of summative testing. End points are taken as age related expectations at the end of each National Curriculum year.

The intended learning is always the focus of actions in the classroom. Activities and resources are carefully chosen and deliberately designed to focus effort towards practising the learning intentions.

Target books are used to personalise individual steps for learning.

Feedback is given is response to timely and continuous formative assessment in every lesson. Teachers use a range of formative assessment tools, including questions and observations to gauge children's level of understanding and knowledge. This is used to either offer support and scaffolds, or to give opportunities for greater challenge to deepen learning. Feedback is given in line with our feedback policy, including Green Pen Work to check, consolidate or challenge.

Starter and plenary activities allow children to become secure within their knowledge and skills. These are useful assessment opportunities: feedback is given to groups or the whole class as identified. Activities are used to revise previous content and address misconceptions as identified through observing children's work and responses and optimum use is made of 'Keep Up' sessions and in those cases where children are further behind 'Catch Up' sessions also. Assessments for SEN children are carefully used so as not to have a detrimental impact on the child's self confidence.

Impact

2017				2018				2019			
KS1		KS2		KS1		KS2		KS1		KS2	
Progress 2				Progress 0.2				Progress -1.2			
EXS (%)	GSD (%)	EXS (%)	GSD (%)	EXS (%)	GSD (%)	EXS (%)	GSD (%)	EXS (%)	GSD (%)	EXS (%)	GSD (%)
84	21	85	20	81	19	80	25	83	28	81	29

NB No validated data available for 2020 & 2021.

No ceiling is placed on any learner: teaching groups are flexible and adapted according to emerging learning needs and the level of support that is needed to enable all children to access the right curriculum content for their learning, whilst all strive to achieve end of year expectations. Children speak positively about the ability to drive their learning through self-assessment and the opportunities they have for extra practice time or additional challenge that the learning journey affords them.

Nearly all children leave Hanging Heaton CE (VC) J&I School having achieved at least the expected standard and as confident mathematicians, ready to take on the next stage in their education. High numbers achieve a greater depth within the standard. SEND children make at least expected progress and reach their attainment targets.

Disadvantaged children make progress that is in line with their peers.

Children leave Hanging Heaton VC (CE) J&I School as confident, capable mathematicians and with a positive attitude towards maths.

2.1 Maths Early Years Progression Charts

The first few years of a child's life are especially important for mathematics development. Research shows that early mathematical knowledge predicts later reading ability and general education and social progress. Conversely, children who start behind in mathematics tend to stay behind throughout their whole educational journey.

The objective for those working in Early Years, then, is to ensure that all children develop firm mathematical foundations in a way that is engaging, and appropriate for their age. The materials here are primarily designed to support Reception teachers (those working with 4-5 year olds), and are based on international research.

The materials are organised into key concepts (not individual objectives), which underpin many early mathematics curricula. The typical progression highlights the range of experiences (some of which may be appropriate for younger children) but the activities and opportunities could be developed across the Reception provision.

There are six key areas of early mathematics learning, which collectively provide a platform for everything children will encounter as they progress through their maths learning at primary school, and beyond.

Cardinality and Counting: Understanding that the cardinal value of a number refers to the quantity, or 'howmanyness' of things it represents

  ➢ **Counting:** saying number words in sequence
  ➢ **Counting:** tagging each object with one number word
  ➢ **Counting:** knowing the last number counted gives the total so far
  ➢ **Subitising:** recognising small quantities without needing to count them all
  ➢ **Numeral meanings**
  ➢ **Conservation:** knowing that the number does not change if things are rearranged (as long as none have been added or taken away)

Comparison: Understanding that comparing numbers involves knowing which numbers are worth more or less than each other

  ➢ **More than/less than**
  ➢ **Identifying groups with the same number of things**
  ➢ **Comparing numbers and reasoning**
  ➢ **Knowing the 'one more than/one less than' relationship**

Composition: Understanding that one number can be made up from (composed from) two or more smaller numbers

  ➢ **Part–whole:** identifying smaller numbers within a number (conceptual subitising – seeing groups and combining to a total)
  ➢ **Inverse operations**
  ➢ **A number can be partitioned into different pairs of number**
  ➢ **A number can be partitioned into more than two numbers**
  ➢ **Number bonds:** knowing which pairs make a given number

Pattern: Looking for and finding patterns helps children notice and understand mathematical relationships

- ➢ **Continuing an AB pattern**
- ➢ **Copying an AB pattern**
- ➢ **Make their own AB pattern**
- ➢ **Spotting an error in an AB pattern**
- ➢ **Identifying the unit of repeat**
- ➢ **Continuing an ABC pattern**
- ➢ **Continuing a pattern which ends mid-unit**
- ➢ **Make their own ABB, ABBC patterns**
- ➢ **Spotting an error in an ABB pattern**
- ➢ **Symbolising the unit structure**
- ➢ **Generalising structures to another context or mode**
- ➢ **Making a pattern which repeats around a circle**
- ➢ **Making a pattern around a border with a fixed number of space**
- ➢ **Pattern-spotting around us**

Shape and Space: Understanding what happens when shapes move, or combine with other shapes, helps develop wider mathematical thinking

- ➢ **Developing spatial awareness: experiencing different viewpoint**
- ➢ **Developing spatial vocabulary**
- ➢ **Shape awareness: developing shape awareness through construction**
- ➢ **Representing spatial relationships**
- ➢ **Identifying similarities between shapes**
- ➢ **Showing awareness of properties of shape**
- ➢ **Describing properties of shape**
- ➢ **Developing an awareness of relationships between shapes**

Measure: Comparing different aspects such as length, weight and volume, as a preliminary to using units to compare later.

- ➢ **Recognising attributes**
- ➢ **Comparing amounts of continuous quantities**
- ➢ **Showing awareness of comparison in estimating and predicting**
- ➢ **Comparing indirectly**
- ➢ **Recognising the relationship between the size and number of units**
- ➢ **Beginning to use units to compare things**
- ➢ **Beginning to use time to sequence events**
- ➢ **Beginning to experience specific time durations**

Number: Addition and Subtraction

National Centre for Excellence in the Teaching of Mathematics

NUMBER BONDS					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
represent and use number bonds and related subtraction facts within 20	recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100				
MENTAL CALCULATION					
add and subtract one-digit and two-digit numbers to 20, including zero	add and subtract numbers using concrete objects, pictorial representations, and mentally, including: * a two-digit number and ones * a two-digit number and tens * two two-digit numbers * adding three one-digit numbers	add and subtract numbers mentally, including: * a three-digit number and ones * a three-digit number and tens * a three-digit number and hundreds		add and subtract numbers mentally with increasingly large numbers	perform mental calculations, including with mixed operations and large numbers
read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs (appears also in Written Methods)	show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot				use their knowledge of the order of operations to carry out calculations involving the four operations

WRITTEN METHODS					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs (appears also in Mental Calculation)		add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction	add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate	add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)	
INVERSE OPERATIONS, ESTIMATING AND CHECKING ANSWERS					
	recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.	estimate the answer to a calculation and use inverse operations to check answers	estimate and use inverse operations to check answers to a calculation	use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy	use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy.

PROBLEM SOLVING					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as 7 = □ - 9	solve problems with addition and subtraction: * using concrete objects and pictorial representations, including those involving numbers, quantities and measures * applying their increasing knowledge of mental and written methods	solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction	solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why	solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why	solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why
	solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change (copied from Measurement)				Solve problems involving addition, subtraction, multiplication and division

2.3 Maths Progression Map Algebra

Algebra

National Centre for Excellence in the Teaching of Mathematics

EQUATIONS					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and **missing number problems** such as $7 = \square - 9$ (copied from Addition and Subtraction)	recognise and use the inverse relationship between addition and subtraction and use this to check calculations and **missing number** problems. (copied from Addition and Subtraction)	solve problems, *including* **missing number** problems, *using number facts, place value, and more complex addition and subtraction.* (copied from Addition and Subtraction) solve problems, including **missing number** problems, involving multiplication and division, including integer scaling (copied from Multiplication and Division)		use the properties of rectangles to deduce related facts and find **missing lengths and angles** (copied from Geometry: Properties of Shapes)	express missing number problems algebraically
	recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100 (copied from Addition and Subtraction)				find pairs of numbers that satisfy number sentences involving two unknowns
represent and use number bonds and related subtraction facts within 20 (copied from Addition and Subtraction)					enumerate all possibilities of combinations of two variables

FORMULAE					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
			Perimeter can be expressed algebraically as $2(a + b)$ where a and b are the dimensions in the same unit. (Copied from NSG measurement)		use simple formulae recognise when it is possible to use **formulae** for area and volume of shapes (copied from Measurement)

SEQUENCES					
sequence events in chronological order using language such as: before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening (copied from Measurement)	compare and sequence intervals of time (copied from Measurement) order and arrange combinations of mathematical objects in patterns (copied from Geometry: position and direction)				generate and describe linear number sequences

2.4 Maths Progression Map Fractions

COUNTING IN FRACTIONAL STEPS					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	Pupils should count in fractions up to 10, starting from any number and using the 1/2 and 2/4 equivalence on the number line (Non Statutory Guidance)	count up and down in tenths	count up and down in hundredths		
RECOGNISING FRACTIONS					
recognise, find and name a half as one of two equal parts of an object, shape or quantity	recognise, find, name and write fractions $\frac{1}{3}$, $\frac{1}{4}$, $\frac{2}{4}$ and $\frac{3}{4}$ of a length, shape, set of objects or quantity	recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators	recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten	recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents (appears also in Equivalence)	
		recognise that tenths arise from dividing an object into 10 equal parts and in dividing one – digit numbers or quantities by 10.			
recognise, find and name a quarter as one of four equal parts of an object, shape or quantity		recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators			
COMPARING FRACTIONS					
		compare and order unit fractions, and fractions with the same denominators		compare and order fractions whose denominators are all multiples of the same number	compare and order fractions, including fractions >1

COMPARING DECIMALS					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
			compare numbers with the same number of decimal places up to two decimal places	read, write, order and compare numbers with up to three decimal places	identify the value of each digit in numbers given to three decimal places
ROUNDING INCLUDING DECIMALS					
			round decimals with one decimal place to the nearest whole number	round decimals with two decimal places to the nearest whole number and to one decimal place	solve problems which require answers to be rounded to specified degrees of accuracy
EQUIVALENCE (INCLUDING FRACTIONS, DECIMALS AND PERCENTAGES)					
	write simple fractions e.g. $\frac{1}{2}$ of 6 = 3 and recognise the equivalence of $\frac{2}{4}$ and $\frac{1}{2}$.	recognise and show, using diagrams, equivalent fractions with small denominators	recognise and show, using diagrams, families of common equivalent fractions	identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths	use common factors to simplify fractions; use common multiples to express fractions in the same denomination
			recognise and write decimal equivalents of any number of tenths or hundredths	read and write decimal numbers as fractions (e.g. 0.71 = $\frac{71}{100}$)	associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375) for a simple fraction (e.g. $\frac{3}{8}$)
				recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents	
			recognise and write decimal equivalents to $\frac{1}{4}$; $\frac{1}{2}$; $\frac{3}{4}$	recognise the per cent symbol (%) and understand that per cent relates to "number of parts per hundred", and write percentages as a fraction with denominator 100 as a decimal fraction	recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.

ADDITION AND SUBTRACTION OF FRACTIONS					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
		add and subtract fractions with the same denominator within one whole (e.g. $\frac{5}{7} + \frac{1}{7} = \frac{6}{7}$)	add and subtract fractions with the same denominator	add and subtract fractions with the same denominator and multiples of the same number	add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions
				recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number (e.g. $\frac{2}{5} + \frac{4}{5} = \frac{6}{5} = 1\frac{1}{5}$)	

MULTIPLICATION AND DIVISION OF FRACTIONS					
				multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams	multiply simple pairs of proper fractions, writing the answer in its simplest form (e.g. $\frac{1}{4} \times \frac{1}{2} = \frac{1}{8}$)
					multiply one-digit numbers with up to two decimal places by whole numbers
					divide proper fractions by whole numbers (e.g. $\frac{1}{3} \div 2 = \frac{1}{6}$)

MULTIPLICATION AND DIVISION OF DECIMALS					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
					multiply one-digit numbers with up to two decimal places by whole numbers
			find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths		multiply and divide numbers by 10, 100 and 1000 where the answers are up to three decimal places
					identify the value of each digit to three decimal places and multiply and divide numbers by 10, 100 and 1000 where the answers are up to three decimal places
					associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375) for a simple fraction (e.g. $\frac{3}{8}$)
					use written division methods in cases where the answer has up to two decimal places

PROBLEM SOLVING					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
		solve problems that involve all of the above	solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number	solve problems involving numbers up to three decimal places	
			solve simple measure and money problems involving fractions and decimals to two decimal places.	solve problems which require knowing percentage and decimal equivalents of $\frac{1}{2}, \frac{1}{4}, \frac{1}{5}, \frac{2}{5}, \frac{4}{5}$ and those with a denominator of a multiple of 10 or 25.	

2.5 Maths Progression Map Geometry – Position and Direction

Geometry: Position and Direction

National Centre for Excellence in the Teaching of Mathematics

POSITION, DIRECTION AND MOVEMENT					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
describe position, direction and movement, including half, quarter and three-quarter turns.	use mathematical vocabulary to describe position, direction and movement including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-clockwise)		describe positions on a 2-D grid as coordinates in the first quadrant	identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed	describe positions on the full coordinate grid (all four quadrants)
			describe movements between positions as translations of a given unit to the left/right and up/down		draw and translate simple shapes on the coordinate plane, and reflect them in the axes.
			plot specified points and draw sides to complete a given polygon		
PATTERN					
	order and arrange combinations of mathematical objects in patterns and sequences				

2.6 Maths Progression Map Geometry – Shape

IDENTIFYING SHAPES AND THIER PROPERTIES					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
recognise and name common 2-D and 3-D shapes, including: * 2-D shapes [e.g. rectangles (including squares), circles and triangles] * 3-D shapes [e.g. cuboids (including cubes), pyramids and spheres].	identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line		identify lines of symmetry in 2-D shapes presented in different orientations	identify 3-D shapes, including cubes and other cuboids, from 2-D representations	recognise, describe and build simple 3-D shapes, including making nets (appears also in Drawing and Constructing)
	identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces				illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius
	identify 2-D shapes on the surface of 3-D shapes, [for example, a circle on a cylinder and a triangle on a pyramid]				

DRAWING AND CONSTRUCTING					
		draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them	complete a simple symmetric figure with respect to a specific line of symmetry	draw given angles, and measure them in degrees (°)	draw 2-D shapes using given dimensions and angles
					recognise, describe and build simple 3-D shapes, including making nets (appears also in Identifying Shapes and Their Properties)

COMPARING AND CLASSIFYING					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	compare and sort common 2-D and 3-D shapes and everyday objects		compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes	use the properties of rectangles to deduce related facts and find missing lengths and angles	compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons
				distinguish between regular and irregular polygons based on reasoning about equal sides and angles	

ANGLES					
		recognise angles as a property of shape or a description of a turn		know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles	
		identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle	identify acute and obtuse angles and compare and order angles up to two right angles by size	identify: * angles at a point and one whole turn (total 360°) * angles at a point on a straight line and ½ a turn (total 180°) * other multiples of 90°	recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles
		identify horizontal and vertical lines and pairs of perpendicular and parallel lines			

2.7   Maths Progression Map Measurement

COMPARING AND ESTIMATING					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
compare, describe and solve practical problems for: * lengths and heights [e.g. long/short, longer/shorter, tall/short, double/half] * mass/weight [e.g. heavy/light, heavier than, lighter than] * capacity and volume [e.g. full/empty, more than, less than, half, half full, quarter] * time [e.g. quicker, slower, earlier, later]	compare and order lengths, mass, volume/capacity and record the results using >, < and =		estimate, compare and calculate different measures, including money in pounds and pence (also included in Measuring)	calculate and compare the area of squares and rectangles including using standard units, square centimetres (cm^2) and square metres (m^2) and estimate the area of irregular shapes (also included in measuring) estimate volume (e.g. using 1 cm^3 blocks to build cubes and cuboids) and capacity (e.g. using water)	calculate, estimate and compare volume of cubes and cuboids using standard units, including centimetre cubed (cm^3) and cubic metres (m^3), and extending to other units such as mm^3 and km^3.
sequence events in chronological order using language [e.g. before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening]	compare and sequence intervals of time	compare durations of events, for example to calculate the time taken by particular events or tasks			
		estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes, hours and o'clock; use vocabulary such as a.m./p.m., morning, afternoon, noon and midnight (appears also in Telling the Time)			

MEASURING and CALCULATING					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
measure and begin to record the following: * lengths and heights * mass/weight * capacity and volume * time (hours, minutes, seconds)	choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels	measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml)	estimate, compare and calculate different measures, including money in pounds and pence (appears also in Comparing)	use all four operations to solve problems involving measure (e.g. length, mass, volume, money) using decimal notation including scaling.	solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate (appears also in Converting)
		measure the perimeter of simple 2-D shapes	measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres	measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres	recognise that shapes with the same areas can have different perimeters and vice versa

MEASURING and CALCULATING					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
recognise and know the value of different denominations of **coins and notes**	recognise and use symbols for pounds **(£) and pence (p)**; combine amounts to make a particular value find different combinations of coins that equal the same amounts of money **solve simple problems** in a practical context involving addition and subtraction of money of the same unit, including giving change	add and subtract amounts of **money** to give change, using both £ and p in practical contexts			
			find the area of rectilinear shapes by counting squares	calculate and compare the area of squares and rectangles including using standard units, square centimetres (cm^2) and square metres (m^2) and estimate the area of irregular shapes *recognise and use square numbers and cube numbers, and the notation for squared (^{2}) and cubed (^{3})* (copied from Multiplication and Division)	calculate the area of parallelograms and triangles calculate, estimate and compare volume of cubes and cuboids using standard units, including cubic centimetres (cm^3) and cubic metres (m^3), and extending to other units [e.g. mm^3 and km^3]. recognise when it is possible to use formulae for area and volume of shapes

TELLING THE TIME					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
tell the time to the hour and half past the hour and draw the hands on a clock face to show these times.	tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times.	tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks	read, write and convert time between analogue and digital 12 and 24-hour clocks (appears also in Converting)		
recognise and use language relating to dates, including days of the week, weeks, months and years	know the number of minutes in an hour and the number of hours in a day. (appears also in Converting)	estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes, hours and o'clock; use vocabulary such as a.m./p.m., morning, afternoon, noon and midnight (appears also in Comparing and Estimating)			
			solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days (appears also in Converting)	solve problems involving converting between units of time	

13

CONVERTING					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	know the number of minutes in an hour and the number of hours in a day. (appears also in Telling the Time)	know the number of seconds in a minute and the number of days in each month, year and leap year	convert between different units of measure (e.g. kilometre to metre; hour to minute)	convert between different units of metric measure (e.g. kilometre and metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre)	use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to three decimal places
			read, write and convert time between analogue and digital 12 and 24-hour clocks (appears also in Converting)	solve problems involving converting between units of time	solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate (appears also in Measuring and Calculating)
			solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days (appears also in Telling the Time)	understand and use equivalences between metric units and common imperial units such as inches, pounds and pints	convert between miles and kilometres

2.8 Maths Progression Map Multiplication & Division

MULTIPLICATION & DIVISION FACTS					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
count in multiples of twos, fives and tens (copied from Number and Place Value)	*count in steps of 2, 3, and 5 from 0, and in tens from any number, forward or backward* (copied from Number and Place Value)	*count from 0 in multiples of 4, 8, 50 and 100* (copied from Number and Place Value)	*count in multiples of 6, 7, 9, 25 and 1000* (copied from Number and Place Value)	*count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000* (copied from Number and Place Value)	
	recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers	recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables	recall multiplication and division facts for multiplication tables up to 12 × 12		
MENTAL CALCULATION					
		write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods (appears also in Written Methods)	use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers	multiply and divide numbers mentally drawing upon known facts	perform mental calculations, including with mixed operations and large numbers
	show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot		recognise and use factor pairs and commutativity in mental calculations (appears also in Properties of Numbers)	multiply and divide whole numbers and those involving decimals by 10, 100 and 1000	*associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375) for a simple fraction (e.g. $^3/_8$)* (copied from Fractions)

WRITTEN CALCULATION					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (×), division (÷) and equals (=) signs	write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods (appears also in Mental Methods)	multiply two-digit and three-digit numbers by a one-digit number using formal written layout	multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers	multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication
				divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context	divide numbers up to 4-digits by a two-digit whole number using the formal written method of short division where appropriate for the context divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context
					use written division methods in cases where the answer has up to two decimal places (copied from Fractions (including decimals))

PROPERTIES OF NUMBERS: MULTIPLES, FACTORS, PRIMES, SQUARE AND CUBE NUMBERS					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
			recognise and use factor pairs and commutativity in mental calculations (repeated)	identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers.	identify common factors, common multiples and prime numbers
				know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers establish whether a number up to 100 is prime and recall prime numbers up to 19	*use common factors to simplify fractions; use common multiples to express fractions in the same denomination* (copied from Fractions)
				recognise and use square numbers and cube numbers, and the notation for squared (^{2}) and cubed (^{3})	*calculate, estimate and compare volume of cubes and cuboids using standard units, including centimetre cubed (cm^3) and cubic metres (m^3), and extending to other units such as mm^3 and km^3* (copied from Measures)

ORDER OF OPERATIONS					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
					use their knowledge of the order of operations to carry out calculations involving the four operations
INVERSE OPERATIONS, ESTIMATING AND CHECKING ANSWERS					
		estimate the answer to a calculation and use inverse operations to check answers (copied from Addition and Subtraction)	*estimate and use inverse operations to check answers to a calculation* (copied from Addition and Subtraction)		use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy

PROBLEM SOLVING					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher	solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts	solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects	solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects	solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes	solve problems involving addition, subtraction, multiplication and division
				solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign	
				solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates	*solve problems involving similar shapes where the scale factor is known or can be found* (copied from Ratio and Proportion)

2.9   Maths Progression Map Place Value

COUNTING					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number			count backwards through zero to include negative numbers	interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero	use negative numbers in context, and calculate intervals across zero
count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens	count in steps of 2, 3, and 5 from 0, and in tens from any number, forward or backward	count from 0 in multiples of 4, 8, 50 and 100;	count in multiples of 6, 7, 9, 25 and 1000	count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000	
given a number, identify one more and one less		find 10 or 100 more or less than a given number	find 1000 more or less than a given number		
COMPARING NUMBERS					
use the language of: equal to, more than, less than (fewer), most, least	compare and order numbers from 0 up to 100; use <, > and = signs	compare and order numbers up to 1000	order and compare numbers beyond 1000 *compare numbers with the same number of decimal places up to two decimal places (copied from Fractions)*	read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit (appears also in Reading and Writing Numbers)	read, write, order and compare numbers up to 10 000 000 and determine the value of each digit (appears also in Reading and Writing Numbers)
IDENTIFYING, REPRESENTING AND ESTIMATING NUMBERS					
identify and represent numbers using objects and pictorial representations including the number line	identify, represent and estimate numbers using different representations, including the number line	identify, represent and estimate numbers using different representations	identify, represent and estimate numbers using different representations		

READING AND WRITING NUMBERS (including Roman Numerals)					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
read and write numbers from 1 to 20 in numerals and words.	read and write numbers to at least 100 in numerals and in words	read and write numbers up to 1000 in numerals and in words		read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit (appears also in Comparing Numbers)	read, write, order and compare numbers up to 10 000 000 and determine the value of each digit (appears also in Understanding Place Value)
		tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks (copied from Measurement)	read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value.	read Roman numerals to 1000 (M) and recognise years written in Roman numerals.	
UNDERSTANDING PLACE VALUE					
	recognise the place value of each digit in a two-digit number (tens, ones)	recognise the place value of each digit in a three-digit number (hundreds, tens, ones)	recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones)	read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit (appears also in Reading and Writing Numbers)	read, write, order and compare numbers up to 10 000 000 and determine the value of each digit (appears also in Reading and Writing Numbers)
			find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as units, tenths and hundredths (copied from Fractions)	*recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents (copied from Fractions)*	*identify the value of each digit to three decimal places and multiply and divide numbers by 10, 100 and 1000 where the answers are up to three decimal places (copied from Fractions)*

ROUNDING					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
			round any number to the nearest 10, 100 or 1000	round any number up to 1 000 000 to the nearest 10, 100, 1 000, 10 000 and 100 000	round any whole number to a required degree of accuracy
			round decimals with one decimal place to the nearest whole number (copied from Fractions)	*round decimals with two decimal places to the nearest whole number and to one decimal place (copied from Fractions)*	*solve problems which require answers to be rounded to specified degrees of accuracy (copied from Fractions)*
PROBLEM SOLVING					
	use place value and number facts to solve problems	solve number problems and practical problems involving these ideas.	solve number and practical problems that involve all of the above and with increasingly large positive numbers	solve number problems and practical problems that involve all of the above	solve number and practical problems that involve all of the above

2.10 Maths Progression Map Ratio and Proportion

					Statements only appear in Year 6 but should be connected to previous learning, particularly fractions and multiplication and division
					Year 6
					solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts
					solve problems involving the calculation of percentages [for example, of measures, and such as 15% of 360] and the use of percentages for comparison
					solve problems involving similar shapes where the scale factor is known or can be found
					solve problems involving unequal sharing and grouping using knowledge of fractions and multiples.

2.11 Maths Progression Map Statistics

Statistics

National Centre for Excellence in the Teaching of Mathematics

INTERPRETING, CONSTRUCTING AND PRESENTING DATA					
Year 1	**Year 2**	**Year 3**	**Year 4**	**Year 5**	**Year 6**
	interpret and construct simple pictograms, tally charts, block diagrams and simple tables	interpret and present data using bar charts, pictograms and tables	interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs	complete, read and interpret information in tables, including timetables	interpret and construct pie charts and line graphs and use these to solve problems
	ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity				
	ask and answer questions about totalling and comparing categorical data				
SOLVING PROBLEMS					
		solve one-step and two-step questions [e.g. 'How many more?' and 'How many fewer?'] using information presented in scaled bar charts and pictograms and tables.	solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs.	solve comparison, sum and difference problems using information presented in a line graph	calculate and interpret the mean as an average

2.12 Ready to Progress Criteria

This section identifies the most important conceptual knowledge and understanding that pupils need as they progress from year 1 to year 6. These important concepts are referred to as ready-to-progress criteria and provide a coherent, linked framework to support pupils' mastery of the primary mathematics curriculum. The ready-to-progress criteria definitions for all year groups are as follows.

Ready-to-progress criteria strands	Code
Number and place value	NPV
Number facts	NF
Addition and subtraction	AS
Multiplication and division	MD
Fractions	F
Geometry	G

Strand	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
NPV	**1NPV–1** Count within 100, forwards and backwards, starting with any number.		**3NPV–1** Know that 10 tens are equivalent to 1 hundred, and that 100 is 10 times the size of 10; apply this to identify and work out how many 10s there are in other three-digit multiples of 10.	**4NPV–1** Know that 10 hundreds are equivalent to 1 thousand, and that 1,000 is 10 times the size of 100; apply this to identify and work out how many 100s there are in other four-digit multiples of 100.	**5NPV–1** Know that 10 tenths are equivalent to 1 one, and that 1 is 10 times the size of 0.1. Know that 100 hundredths are equivalent to 1 one, and that 1 is 100 times the size of 0.01. Know that 10 hundredths are equivalent to 1 tenth, and that 0.1 is 10 times the size of 0.01. $\rightarrow$	**6NPV–1** Understand the relationship between powers of 10 from 1 hundredth to 10 million, and use this to make a given number 10, 100, 1,000, 1 tenth, 1 hundredth or 1 thousandth times the size (multiply and divide by 10, 100 and 1,000).
		2NPV–1 Recognise the place value of each digit in two-digit numbers, and compose and decompose two-digit numbers using standard and non-standard partitioning. $\rightarrow$	**3NPV–2** Recognise the place value of each digit in *three*-digit numbers, and compose and decompose *three*-digit numbers using standard and non-standard partitioning. $\rightarrow$	**4NPV–2** Recognise the place value of each digit in *four*-digit numbers, and compose and decompose *four*-digit numbers using standard and non-standard partitioning. $\rightarrow$	**5NPV–2** Recognise the place value of each digit in numbers with up to 2 decimal places, and compose and decompose numbers with up to 2 decimal places using standard and non-standard partitioning. $\rightarrow$	**6NPV–2** Recognise the place value of each digit in numbers up to 10 million, including decimal fractions, and compose and decompose numbers up to 10 million using standard and non-standard partitioning.
	1NPV–2 Reason about the location of numbers to 20 within the linear number system, including comparing using < > and = $\rightarrow$	**2NPV–2** Reason about the location of any two-digit number in the linear number system, including identifying the previous and next multiple of 10. $\rightarrow$	**3NPV–3** Reason about the location of any *three*-digit number in the linear number system, including identifying the previous and next multiple of 100 and 10. $\rightarrow$	**4NPV–3** Reason about the location of any *four*-digit number in the linear number system, including identifying the previous and next multiple of 1,000 and 100, and rounding to the nearest of each. $\rightarrow$	**5NPV–3** Reason about the location of any number with up to 2 decimals places in the linear number system, including identifying the previous and next multiple of 1 and 0.1 and rounding to the nearest of each. $\rightarrow$	**6NPV–3** Reason about the location of any number up to 10 million, including decimal fractions, in the linear number system, and round numbers, as appropriate, including in contexts.

Strand	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
NPV			**3NPV–4** Divide 100 into 2, 4, 5 and 10 equal parts, and read scales/number lines marked in multiples of 100 with 2, 4, 5 and 10 equal parts. →	**4NPV–4** Divide 1,000 into 2, 4, 5 and 10 equal parts, and read scales/number lines marked in multiples of 1,000 with 2, 4, 5 and 10 equal parts. →	**5NPV–4** Divide 1 into 2, 4, 5 and 10 equal parts, and read scales/number lines marked in units of 1 with 2, 4, 5 and 10 equal parts. →	**6NPV–4** Divide powers of 10, from 1 hundredth to 10 million, into 2, 4, 5 and 10 equal parts, and read scales/number lines with labelled intervals divided into 2, 4, 5 and 10 equal parts.
					5NPV–5 Convert between units of measure, including using common decimals and fractions.	
NF	**1NF–1** Develop fluency in addition and subtraction facts within 10. →	**2NF–1** Secure fluency in addition and subtraction facts within 10, through continued practice. →	**3NF–1** Secure fluency in addition and subtraction facts that bridge 10, through continued practice.			
	1NF–2 Count forwards and backwards in multiples of 2, 5 and 10, up to 10 multiples, beginning with any multiple, and count forwards and backwards through the odd numbers. →		**3NF–2** Recall multiplication facts, and corresponding division facts, in the 10, 5, 2, 4 and 8 multiplication tables, and recognise products in these multiplication tables as multiples of the corresponding number. →	**4NF–1** Recall multiplication and division facts up to 12 × 12, and recognise products in multiplication tables as multiples of the corresponding number. →	**5NF–1** Secure fluency in multiplication table facts, and corresponding division facts, through continued practice.	
				4NF–2 Solve division problems, with two-digit dividends and one-digit divisors, that involve remainders, and interpret remainders appropriately according to the context.		
			3NF–3 Apply place-value knowledge to known additive and multiplicative number facts (scaling facts by 10). →	**4NF–3** Apply place-value knowledge to known additive and multiplicative number facts (scaling facts by 100) →	**5NF–2** Apply place-value knowledge to known additive and multiplicative number facts (scaling facts by 1 tenth or 1 hundredth).	

Strand	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
AS	**1AS–1** Compose numbers to 10 from 2 parts, and partition numbers to 10 into parts, including recognising odd and even numbers.	**2AS–1** Add and subtract across 10.	**3AS–1** Calculate complements to 100.			**6AS/MD–1** Understand that 2 numbers can be related additively or multiplicatively, and quantify additive and multiplicative relationships (multiplicative relationships restricted to multiplication by a whole number).
	1AS–2 Read, write and interpret equations containing addition (+), subtraction (−) and equals (=) symbols, and relate additive expressions and equations to real-life contexts.	**2AS–2** Recognise the subtraction structure of 'difference' and answer questions of the form, "How many more…?".	**3AS–2** Add and subtract up to three-digit numbers using columnar methods.			**6AS/MD–2** Use a given additive or multiplicative calculation to derive or complete a related calculation, using arithmetic properties, inverse relationships, and place-value understanding.
		2AS–3 Add and subtract within 100 by applying related one-digit addition and subtraction facts: add and subtract only ones or only tens to/from a two-digit number.	**3AS–3** Manipulate the additive relationship: Understand the inverse relationship between addition and subtraction, and how both relate to the part–part–whole structure. Understand and use the commutative property of addition, and understand the related property for subtraction.			**6AS/MD–3** Solve problems involving ratio relationships.
		2AS–4 Add and subtract within 100 by applying related one-digit addition and subtraction facts: add and subtract any 2 two-digit numbers.				**6AS/MD–4** Solve problems with 2 unknowns.

Strand	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
MD		**2MD–1** Recognise repeated addition contexts, representing them with multiplication equations and calculating the product, within the 2, 5 and 10 multiplication tables.	**3MD–1** Apply known multiplication and division facts to solve contextual problems with different structures, including quotitive and partitive division.	**4MD–1** Multiply and divide whole numbers by 10 and 100 (keeping to whole number quotients); understand this as equivalent to making a number 10 or 100 times the size. →	**5MD–1** Multiply and divide numbers by 10 and 100; understand this as equivalent to making a number 10 or 100 times the size, or 1 tenth or 1 hundredth times the size.	For year 6, MD ready-to-progress criteria are combined with AS ready-to-progress criteria (please see above).
		2MD–2 Relate grouping problems where the number of groups is unknown to multiplication equations with a missing factor, and to division equations (quotitive division).		**4MD–2** Manipulate multiplication and division equations, and understand and apply the commutative property of multiplication.	**5MD–2** Find factors and multiples of positive whole numbers, including common factors and common multiples, and express a given number as a product of 2 or 3 factors.	
				4MD–3 Understand and apply the distributive property of multiplication. →	**5MD–3** Multiply any whole number with up to 4 digits by any one-digit number using a formal written method.	
					5MD–4 Divide a number with up to 4 digits by a one-digit number using a formal written method, and interpret remainders appropriately for the context.	

Strand	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
F			**3F–1** Interpret and write proper fractions to represent 1 or several parts of a whole that is divided into equal parts.			**6F–1** Recognise when fractions can be simplified, and use common factors to simplify fractions.
			3F–2 Find unit fractions of quantities using known division facts (multiplication tables fluency). →		**5F–1** Find non-unit fractions of quantities.	**6F–2** Express fractions in a common denomination and use this to compare fractions that are similar in value.
			3F–3 Reason about the location of any fraction within 1 in the linear number system. →	**4F–1** Reason about the location of mixed numbers in the linear number system.		**6F–3** Compare fractions with different denominators, including fractions greater than 1, using reasoning, and choose between reasoning and common denomination as a comparison strategy.
				4F–2 Convert mixed numbers to improper fractions and vice versa.	**5F–2** Find equivalent fractions and understand that they have the same value and the same position in the linear number system.	
			3F–4 Add and subtract fractions with the same denominator, within 1. →	**4F–3** Add and subtract improper and mixed fractions with the same denominator, including bridging whole numbers.	**5F–3** Recall decimal fraction equivalents for $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{5}$ and $\frac{1}{10}$, and for multiples of these proper fractions.	
G	**1G–1** Recognise common 2D and 3D shapes presented in different orientations, and know that rectangles, triangles, cuboids and pyramids are not always similar to one another. →	**2G–1** Use precise language to describe the properties of 2D and 3D shapes, and compare shapes by reasoning about similarities and differences in properties. →	**3G–1** Recognise right angles as a property of shape or a description of a turn, and identify right angles in 2D shapes presented in different orientations.		**5G–1** Compare angles, estimate and measure angles in degrees (°) and draw angles of a given size.	

Strand	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
G					5G–2 Compare areas and calculate the area of rectangles (including squares) using standard units.	
	1G–2 Compose 2D and 3D shapes from smaller shapes to match an example, including manipulating shapes to place them in particular orientations. →		3G–2 Draw polygons by joining marked points, and identify parallel and perpendicular sides. →	4G–1 Draw polygons, specified by coordinates in the first quadrant, and translate within the first quadrant. →		6G–1 Draw, compose, and decompose shapes according to given properties, including dimensions, angles and area, and solve related problems.
				4G–2 Identify regular polygons, including equilateral triangles and squares, as those in which the side-lengths are equal and the angles are equal. Find the perimeter of regular and irregular polygons.		
				4G–3 Identify line symmetry in 2D shapes presented in different orientations. Reflect shapes in a line of symmetry and complete a symmetric figure or pattern with respect to a specified line of symmetry.		

2.13 Maths End Points By Year - EYFS:

Reception EYFS Maths   Name:
3 – 4 years
• Fast recognition of up to 3 objects, without having to count them individually ('subitising').
• Recite numbers past 5.
• Say one number for each item in order: 1,2,3,4,5.
• Know that the last number reached when counting a small set of objects tells you how many there are in total ('cardinal principle').
• Show 'finger numbers' up to 5.
• Link numerals and amounts: for example, showing the right number of objects to match the numeral, up to 5.
• Experiment with their own symbols and marks as well as numerals.
• Solve real world mathematical problems with numbers up to 5.
• Compare quantities using language: 'more than', 'fewer than'.
• Talk about and explore 2D and 3D shapes (for example, circles, rectangles, triangles and cuboids) using informal and mathematical language: 'sides', 'corners'; 'straight', 'flat', 'round'.
• Understand position through words alone – for example, "The bag is under the table," – with no pointing.
• Describe a familiar route.
• Discuss routes and locations, using words like 'in front of' and 'behind
• Make comparisons between objects relating to size, length, weight and capacity
• Select shapes appropriately: flat surfaces for building, a triangular prism for a roof etc
• Combine shapes to make new ones – an arch, a bigger triangle etc.
• Talk about and identifies the patterns around them. For example: stripes on clothes, designs on rugs and wallpaper. Use informal language like 'pointy', 'spotty', 'blobs' etc.
• Extend and create ABAB patterns – stick, leaf, stick, leaf.
• Notice and correct an error in a repeating pattern.
• Begin to describe a sequence of events, real or fictional, using words such as 'first', 'then...'
Reception
• Count objects, actions and sounds.
• Subitise.
• Link the number symbol (numeral) with its cardinal number value
• Count beyond ten.
• Compare numbers
• Understand the 'one more than/one less than' relationship between consecutive numbers.
• Explore the composition of numbers to 10.
• Automatically recall number bonds for numbers 0–10.
• Select, rotate and manipulate shapes in order to develop spatial reasoning skills.
• Compose and decompose shapes so that children recognise a shape can have other shapes within it, just as numbers can.
• Continue, copy and create repeating patterns.
• Compare length, weight and capacity.
ELGs - Number
• Have a deep understanding of number to 10, including the composition of each number.
• Subitise (recognise quantities without counting) up to 5.
• Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts) and some number bonds to 10, including double facts.
ELGs – Numerical Patterns
• Verbally count beyond 20, recognising the pattern of the counting system.
• Compare quantities up to 10 in different contexts, recognising when one quantity is greater than, less than or the same as the other Quantity`.
• Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed equally

Year 1 Maths Curriculum
Numbers and the number system
count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number
count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens given a number, identify one more and one less
identify and represent numbers using objects and pictorial representations including the number line, and use the language of: equal to, more than, less than (fewer), most, least
read and write numbers from 1 to 20 in numerals and words
Addition and subtraction
read, write and interpret mathematical statements involving addition (+), subtraction (–) and equals (=) signs
represent and use number bonds and related subtraction facts within 20
add and subtract one-digit and two-digit numbers to 20, including zero
solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \_ - 9$
Multiplication and division
solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher.
Fractions and decimals
recognise, find and name a half as one of two equal parts of an object, shape or quantity
recognise, find and name a quarter as one of four equal parts of an object, shape or quantity.
Measurement
compare, describe and solve practical problems for: lengths and heights [for example, long/short, longer/shorter, tall/short, double/half] mass/weight [for example, heavy/light, heavier than, lighter than] capacity and volume [for example, full/empty, more than, less than, half, half full, quarter] time [for example, quicker, slower, earlier, later]
measure and begin to record the following: lengths and heights mass/weight capacity and volume time (hours, minutes, seconds)
recognise and know the value of different denominations of coins and notes
sequence events in chronological order using language [for example, before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening]
recognise and use language relating to dates, including days of the week, weeks, months and years
tell the time to the hour and half past the hour and draw the hands on a clock face to show these times.
Geometry
recognise and name common 2-D and 3-D shapes, including: 2-D shapes [for example, rectangles (including squares), circles and triangles] 3-D shapes [for example, cuboids (including cubes), pyramids and spheres]
Describe position, direction and movement, including whole, half, quarter and three-quarter turns

Year 2 Maths Curriculum:

Numbers and the number system

count in steps of 2, 3, and 5 from 0, and in tens from any number, forward and backward

recognise the place value of each digit in a two-digit number (tens, ones)

identify, represent and estimate numbers using different representations, including the number line

compare and order numbers from 0 up to 100; use <, > and = signs

read and write numbers to at least 100 in numerals and in words

use place value and number facts to solve problems.

Addition and subtraction

solve problems with addition and subtraction:

using concrete objects and pictorial representations, including those involving numbers, quantities and measures

applying their increasing knowledge of mental and written methods

recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100

add and subtract numbers using concrete objects, pictorial representations, and mentally, including:
a two-digit number and ones
a two-digit number and tens
two two-digit numbers
adding three one-digit numbers

show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot

recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.

Multiplication and division

recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers

calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (×), division (÷) and equals (=) signs

show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot

solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts

Fractions and decimals

recognise, find, name and write fractions 1/3, ¼, 2/4 and ¾ of a length, shape, set of objects or quantity

write simple fractions for example, ½ of 6 = 3 and recognise the equivalence of 2/4 and 1/2

Measurement

choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels

compare and order lengths, mass, volume/capacity and record the results using >, < and =

recognise and use symbols for pounds (£) and pence (p); combine amounts to make a particular value

find different combinations of coins that equal the same amounts of money

solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change

compare and sequence intervals of time

tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times

know the number of minutes in an hour and the number of hours in a day.

Geometry

identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line

identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces

identify 2-D shapes on the surface of 3-D shapes, [for example, a circle on a cylinder and a triangle on a pyramid]

compare and sort common 2-D and 3-D shapes and everyday objects.

order and arrange combinations of mathematical objects in patterns and sequences

use mathematical vocabulary to describe position, direction and movement, including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-clockwise)

Statistics

interpret and construct simple pictograms, tally charts, block diagrams and simple tables

ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity

ask and answer questions about totalling and comparing categorical data.

Year 3 Maths Curriculum

Numbers and the number system

count from 0 in multiples of 4, 8, 50 and 100; find 10 or 100 more or less than a given number

recognise the place value of each digit in a three-digit number (hundreds, tens, ones)

compare and order numbers up to 1000

identify, represent and estimate numbers using different representations

read and write numbers up to 1000 in numerals and in words

solve number problems and practical problems involving these ideas.

Addition and subtraction

add and subtract numbers mentally, including: a three-digit number and ones, a three-digit number and tens
a three-digit number and hundreds

add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction

estimate the answer to a calculation and use inverse operations to check answers

solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction

Multiplication and division

recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables

write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods

solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects.

Fractions and decimals

count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10

count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10

recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators

recognise and show, using diagrams, equivalent fractions with small denominators

add and subtract fractions with the same denominator within one whole [for example, 1/7 + 3/7 = 4/7]

compare and order unit fractions, and fractions with the same denominators

solve problems that involve all of the above.

Measurement

measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml)

measure the perimeter of simple 2-D shapes

add and subtract amounts of money to give change, using both £ and p in practical contexts

tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks

estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes and hours; use vocabulary such as o'clock, a.m./p.m., morning, afternoon, noon and midnight

know the number of seconds in a minute and the number of days in each month, year and leap year
compare durations of events [for example to calculate the time taken by particular events or tasks].

Geometry

draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them

recognise angles as a property of shape or a description of a turn

identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle

identify horizontal and vertical lines and pairs of perpendicular and parallel lines.

Statistics

interpret and present data using bar charts, pictograms and tables

solve one-step and two-step questions [for example, 'How many more?' and 'How many fewer?'] using information presented in scaled bar charts and pictograms and tables.

Year 4 Maths Curriculum
Numbers and the number system
count in multiples of 6, 7, 9, 25 and 1000
find 1000 more or less than a given number
count backwards through zero to include negative numbers
recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones)
order and compare numbers beyond 1000
identify, represent and estimate numbers using different representations
round any number to the nearest 10, 100 or 1000
solve number and practical problems that involve all of the above and with increasingly large positive numbers
read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value
Addition and subtraction
add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate
estimate and use inverse operations to check answers to a calculation
solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why
Multiplication and division
recall multiplication and division facts for multiplication tables up to 12×12
use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers
recognise and use factor pairs and commutativity in mental calculations
multiply two-digit and three-digit numbers by a one-digit number using formal written layout
solve problems involving multiplying and adding, including using the distributive law
to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects.
Fractions and decimals
recognise and show, using diagrams, families of common equivalent fractions
count up and down in hundredths; recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten.
solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number
add and subtract fractions with the same denominator
recognise and write decimal equivalents of any number of tenths or hundredths
recognise and write decimal equivalents to ¼, ½, ¾
find the effect of dividing a one- or two-digit number by 10 and 100, identifying the
value of the digits in the answer as ones, tenths and hundredths
round decimals with one decimal place to the nearest whole number
compare numbers with the same number of decimal places up to two decimal places
solve simple measure and money problems involving fractions and decimals to two decimal places.
Measurement
Convert between different units of measure [for example, kilometre to metre; hour to minute]
measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres
find the area of rectilinear shapes by counting squares
estimate, compare and calculate different measures, including money in pounds and Pence
read, write and convert time between analogue and digital 12- and 24-hour clocks
solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days.
Geometry
compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes
identify acute and obtuse angles and compare and order angles up to two right angles by size
identify lines of symmetry in 2-D shapes presented in different orientations
complete a simple symmetric figure with respect to a specific line of symmetry. describe positions on a 2-D grid as coordinates in the first quadrant
describe movements between positions as translations of a given unit to the left/right and up/down
plot specified points and draw sides to complete a given polygon.
Statistics
interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs.
solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs

Year5 Maths Curriculum

Numbers and the number system

read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit

count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000

interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero

round any number up to 1 000 000 to the nearest 10, 100, 1000, 10 000 and 100 000

solve number problems and practical problems that involve all of the above

read Roman numerals to 1000 (M) and recognise years written in Roman numerals.

Addition and subtraction

add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)

add and subtract numbers mentally with increasingly large numbers

use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy

solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why

Multiplication and division

identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers

identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers

establish whether a number up to 100 is prime and recall prime numbers up to 19

multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers

multiply and divide numbers mentally drawing upon known facts

divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context

multiply and divide whole numbers and those involving decimals by 10, 100 and 1000

recognise and use square numbers and cube numbers, and the notation for squared and cubed

solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes

solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign

solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates

Fractions and decimals

compare and order fractions whose denominators are all multiples of the same number

identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths

recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number

add and subtract fractions with the same denominator and denominators that are multiples of the same number

multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams

read and write decimal numbers as fractions [for example, 0.71 = 71/100]

recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents

round decimals with two decimal places to the nearest whole number and to one decimal place

read, write, order and compare numbers with up to three decimal places

solve problems involving number up to three decimal places

recognise the per cent symbol (%) and understand that per cent relates to 'number of parts per hundred', and write percentages as a fraction with denominator 100, and as a decimal

solve problems which require knowing percentage and decimal equivalents of ½, ¼, 1/5, 2/5 and 4/5 and those fractions with a denominator of a multiple of 10 or 25.

Measurement

convert between different units of metric measure (for example, kilometre and metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre)

understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints

measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres

calculate and compare the area of rectangles (including squares), and including using standard units, square centimetres (cm2) and square metres (m2) and estimate the area of irregular shapes

estimate volume [for example, using 1 cm3 blocks to build cuboids (including cubes)] and capacity [for example, using water]

solve problems involving converting between units of time

use all four operations to solve problems involving measure [for example, length, mass, volume, money] using decimal notation, including scaling

Geometry

identify 3-D shapes, including cubes and other cuboids, from 2-D representations

know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles

draw given angles, and measure them in degrees (o)

identify: angles at a point and one whole turn (total 360o) , angles at a point on a straight line and , 1/2 a turn (total 180o) other multiples of 90o

use the properties of rectangles to deduce related facts and find missing lengths and angles

distinguish between regular and irregular polygons based on reasoning about equal sides and angles.

identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed

Statistics

solve comparison, sum and difference problems using information presented in a line graph

complete, read and interpret information in tables, including timetables

Year 6 Maths Curriculum
Numbers and the number system
read, write, order and compare numbers up to 10 000 000 and determine the value of each digit
round any whole number to a required degree of accuracy
use negative numbers in context, and calculate intervals across zero
solv e number and practical problems that involve all of the above
Addition, subtraction, multiplication and division
multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication
perform mental calculations, including with mixed operations and large numbers
divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context
divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to the context
identify common factors, common multiples and prime numbers
use their knowledge of the order of operations to carry out calculations involving the four operations
solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why
solve problems involving addition, subtraction, multiplication and division
use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy.
Fractions and decimals
use common factors to simplify fractions; use common multiples to express fractions in the same denomination
compare and order fractions, including fractions > 1
add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions
multiply simple pairs of proper fractions, writing the answer in its simplest form [for example, ¼ x ½ = 1/8]
divide proper fractions by whole numbers [for example, 1/3 ÷ 2 = 1/6]
associate a fraction with division and calculate decimal fraction equivalents [for example, 0.375] for a simple fraction [for example, 3/8]
identify the value of each digit in numbers given to three decimal places and multiply and divide numbers by 10, 100 and 1000 giving answers up to three decimal places
multiply one-digit numbers with up to two decimal places by whole numbers
use written division methods in cases where the answer has up to two decimal places
solve problems which require answers to be rounded to specified degrees of accuracy
recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.
Ratio and Proportion
solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts
solve problems involving the calculation of percentages [for example, of measures, and such as 15% of 360] and the use of percentages for comparison
solve problems involving similar shapes where the scale factor is known or can be found
solve problems involving unequal sharing and grouping using knowledge of fractions and multiples.
Algebra
use simple formulae
generate and describe linear number sequences
express missing number problems algebraically
find pairs of numbers that satisfy an equation with two unknowns
enumerate possibilities of combinations of two variables.
Measurement
solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate
use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to three decimal places
convert between miles and kilometres
recognise that shapes with the same areas can have different perimeters and vice versa
recognise when it is possible to use formulae for area and volume of shapes
calculate the area of parallelograms and triangles
calculate, estimate and compare volume of cubes and cuboids using standard units, including cubic centimetres (cm3) and cubic metres (m3), and extending to other unit[for example, mm3 and km3].
Geometry
draw 2-D shapes using given dimensions and angles
recognise, describe and build simple 3-D shapes, including making nets
compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons
illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius
recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles
describe positions on the full coordinate grid (all four quadrants)
draw and translate simple shapes on the coordinate plane, and reflect them in the axes
Statistics
interpret and construct pie charts and line graphs and use these to solve problems
calculate and interpret the mean as an average.

2.14 Maths Teaching Sequences Summary

Class 1 – Reception/Year 1 – To be taught as two different lessons

EYFS

	Week 1	Week 2	Week 3	Week 4	Week 5	Week 6	Week 7	Week 8	Week 9	Week 10	Week 11	Week 12
Autumn	Getting to know you (Take this time to play and get to know the children!)			Just like me!			It's me 1, 2, 3!			Light and Dark		
Spring	Alive in 5!			Growing 6, 7, 8			Building 9 and 10			Consolidation		
Summer	To 20 and Beyond			First, then, now			Find My Pattern			On the Move		

Year 1

	Week 1	Week 2	Week 3	Week 4	Week 5	Week 6	Week 7	Week 8	Week 9	Week 10	Week 11	Week 12
Autumn	Number: Place Value (within 10)				Number: Addition and Subtraction (within 10)					Geometry: Shape	Number: Place Value (within 20)	
Spring	Consolidation	Number: Addition and Subtraction (within 20)			Number: Place Value (within 50)			Measurement: Length and Height		Measurement: Weight and Volume		Consolidation
Summer	Consolidation	Number: Multiplication and Division			Number: Fractions		Geometry: Position and Direction	Number: Place Value (within 100)		Measurement: Money	Measurement: Time	

33

Class 2 – Year 1/2 - to be taught as two separate lessons

	Week 1	Week 2	Week 3	Week 4	Week 5	Week 6	Week 7	Week 8	Week 9	Week 10	Week 11	Week 12
Autumn	Number: Place Value Y1 – Numbers to 20 Y2 – Numbers to 100			Number: Addition and Subtraction Year 1- Numbers within 20 (including recognising money) Year 2- Numbers within 100 (including money)						Number: Year 1: Place Value to 50 and Multiplication Year 2: Multiplication		
Spring	Number: Year 1: Division & consolidation Year 2: Division		Year 1: Place Value to 100 Year 2: Statistics		Measurement: Length and Height	Geometry: Year 1: Shape and Consolidation Year 2: Properties of Shape				Number: Year 1: Fractions and Consolidation Year 2: Fractions		Consolidation
Summer	Geometry: Position and Direction	Measurement: Time		Problem solving and efficient methods		Measurement: Year 1: Weight and Volume Year 2: Mass, Capacity and Temperature			Consolidation and Investigations			

Class 3 – Year 3/4

	Week 1	Week 2	Week 3	Week 4	Week 5	Week 6	Week 7	Week 8	Week 9	Week 10	Week 11	Week 12
Autumn	Number: Place Value				Number: Addition and Subtraction				Number: Multiplication and Division			
Spring	Number: Multiplication and Division		Measurement: Length, Perimeter and Area		Number: Fractions				Y3: Measurement: Mass and Capacity / Y4: Number: Decimals			Consolidation
Summer	Number: Decimals (including Money)			Measurement: Time		Statistics		Geometry: Properties of Shape (Including Y4 Position and Direction)				Consolidation

Class 4 – Year 4/5

	Week 1	Week 2	Week 3	Week 4	Week 5	Week 6	Week 7	Week 8	Week 9	Week 10	Week 11	Week 12
Autumn	Number: Place Value				Number: Addition and Subtraction			Number: Multiplication and Division			Measurement: Length, Perimeter and Area	
Spring	Number: Multiplication and Division		Number: Fractions						Number: Decimals (Including Y5 Percentages)			
Summer	Number: Decimals (including Y4 Money)		Measurement: Time	Statistics		Geometry: Properties of Shape			Geometry: Position and Direction	Y4: Consolidation Y5: Converting Units & Volume		Consolidation

36

Class 5 – Year 5/6

	Week 1	Week 2	Week 3	Week 4	Week 5	Week 6	Week 7	Week 8	Week 9	Week 10	Week 11	Week 12
Autumn	Number: Place Value		Number: Four Operations					Number: Fractions				
Spring	Y5: Number: Fractions Y6: Number: Ratio		Number: Decimals and Percentages			Y5: Number: Decimals Y6: Number: Algebra		Measurement: Converting Units	Measurement: Perimeter, Area and Volume		Statistics	
Summer	Geometry: Properties of Shape		Geometry: Position and Direction	Y6: SATS		Investigations and Consolidation

	Friday	Review, Consolidate and Reinforce

Summary

Week	Day	Topic
1 25/4/22 To 20 and beyond	Monday	Recap – subitising
	Tuesday	Recap - composition
	Wednesday	Recap – comparing and ordering
	Thursday	Building numbers beyond 10 1
	Friday	Building numbers beyond 10 2
2 2/5/22 To 20 and beyond	Monday	Bank holiday
	Tuesday	Counting patterns beyond 10 1
	Wednesday	Counting patterns beyond 10 2
	Thursday	Digging Deeper - numbers beyond 10
	Friday	Digging Deeper - capacity
3 9/5/22 To 20 and beyond	Monday	Spatial reasoning rotation 1
	Tuesday	Spatial reasoning rotation 2
	Wednesday	Spatial reasoning rotation 3
	Thursday	Digging Deeper Spatial reasoning rotation 1
	Friday	Digging Deeper Spatial reasoning rotation 2
4 16/5/22 First then now	Monday	Adding more 1
	Tuesday	Adding more 2
	Wednesday	Taking away 1
	Thursday	Taking away 2
	Friday	Taking away 3
5 23/5/22 First then now	Monday	Digging Deeper –adding and taking away
	Tuesday	Spatial reasoning shapes 1
	Wednesday	Spatial reasoning shapes 2
	Thursday	Digging Deeper - spatial reasoning
	Friday	Inset
6 6/6/22 Review	Monday	Review, Consolidate and Reinforce
	Tuesday	Review, Consolidate and Reinforce
	Wednesday	Review, Consolidate and Reinforce
	Thursday	Review, Consolidate and Reinforce
	Friday	Review, Consolidate and Reinforce
7 13/6/22 Find my pattern	Monday	Doubling 1
	Tuesday	Doubling 2
	Wednesday	Doubling 3
	Thursday	Sharing and grouping 1

Week	Day	Topic
	Friday	Sharing and grouping 2
8 20/6/22 Find my pattern	Monday	Sharing and grouping 3
	Tuesday	Even and odd 1
	Wednesday	Even and odd 2
	Thursday	Even and odd 3
	Friday	Digging Deeper odd/even
9 27/6/22 Find my pattern	Monday	Digging Deeper find half
	Tuesday	Digging Deeper make 2 equal groups
	Wednesday	Spatial reasoning - viewpoints
	Thursday	Spatial reasoning recreating
	Friday	Digging Deeper - Spatial reasoning
10 4/7/22 On the move	Monday	Consolidation - subitising
	Tuesday	Consolidation - counting
	Wednesday	Consolidation - sorting
	Thursday	Consolidation - matching
	Friday	Consolidation - comparing
11 11/7/22 One the move	Monday	Consolidation - ordering
	Tuesday	Deepening Understanding (Conceptual Variation)
	Wednesday	Patterns and relationships
	Thursday	Spatial reasoning - directions
	Friday	Digging Deeper – Problem solving
12 18/7/22 Review	Monday	Review, Consolidate and Reinforce
	Tuesday	Review, Consolidate and Reinforce
	Wednesday	Review, Consolidate and Reinforce
	Thursday	Review, Consolidate and Reinforce
	Friday	Review, Consolidate and Reinforce

Year 1 – Autumn Term

White Rose Maths

Lesson by lesson overview 2020/21

Week	Day	Topic	
1 07/09/2020	Monday	Sorting up to 10 objects	NPV-1
	Tuesday	Count objects to 10	NPV-1
	Wednesday	Count objects from a group of 10	NPV-1
	Thursday	Represent up to 10 objects	NPV-1
	Friday	Represent numbers to 10	NPV-1
2 14/09/2020	Monday	Count forwards to 10	NPV-1
	Tuesday	Count backwards from 10	NPV-1
	Wednesday	Count one more for numbers within 10	NPV-1
	Thursday	Count one less for numbers within 10	NPV-1
	Friday	Counting activity	NPV-1
3 21/09/2020	Monday	One to one correspondence	NPV-1
	Tuesday	Compare up to 10 objects	NPV-2
	Wednesday	Introduce <, > and = for numbers within 10	NPV-2
	Thursday	Compare numbers within 10	NPV-2
	Friday	Comparing activity	NPV-2
4 28/09/2020	Monday	Order up to 10 objects	NPV-2
	Tuesday	Order numbers up to 10	NPV-2
	Wednesday	Ordinal numbers	NPV-2
	Thursday	The number line from 0 to 10	NPV-2
	Friday	Mini assessment	

Week	Day	Topic	
5 05/10/2020	Monday	Introducing parts and wholes (single object)	AS-1
	Tuesday	Parts and wholes activity (groups of objects)	AS-1
	Wednesday	Part-whole model (with images)	AS-1
	Thursday	Part-whole model	AS-1
	Friday	Addition symbol	AS-2
6 12/10/2020	Monday	Fact families - addition facts	NF-1 AS-2
	Tuesday	Find number bonds for numbers within 10	NF-1 AS-2
	Wednesday	Systematic methods for number bonds within 10	NF-1 AS-1
	Thursday	Number bonds to 10	NF-1 AS-1
	Friday	Compare number bonds	NF-1 AS-1
7 19/10/2020	Monday	Addition - adding together	NF-1 AS-2
	Tuesday	Addition - adding more	NF-1 AS-2
	Wednesday	Addition - adding more	NF-1 AS-2
	Thursday	Addition - using bonds	NF-1 AS-2
	Friday	Finding a part	NF-1 AS-1
8 02/11/2020	Monday	Subtraction - taking away - crossing out	NF-1 AS-2
	Tuesday	Subtraction - taking away - using the symbol	NF-1 AS-2
	Wednesday	Subtraction - find a part	NF-1 AS-2
	Thursday	Fact families - the 8 facts	NF-1 AS-2
	Friday	Subtraction - counting back	NF-1 AS-2
9 09/11/2020	Monday	Subtraction - finding the difference	NF-1 AS-2
	Tuesday	Subtraction - finding the difference	NF-1 AS-2
	Wednesday	Comparing addition and subtraction statements a + b > c	AS-2
	Thursday	Comparing addition and subtraction statements a + b > c + d	AS-2
	Friday	Mini-assessment	

Week	Day	Topic	
10 16/11/2020	Monday	Recognise and name 3-D shapes	G-1
	Tuesday	Sort 3-D shapes	G-1
	Wednesday	Recognise and name 2-D shapes	G-1
	Thursday	Sort 2-D shapes	G-1
	Friday	Patterns with 3-D and 2-D shapes	G-1
11 23/11/2020	Monday	Count forwards and backwards and write numbers to 20	NPV-1
	Tuesday	Numbers from 11 to 20	NPV-1
	Wednesday	Tens and ones	NPV-1
	Thursday	Tens and ones	NPV-1
	Friday	Count one more one less	NPV-1
12 30/11/2020	Monday	Compare groups of objects	NPV-2
	Tuesday	Compare numbers	NPV-2
	Wednesday	Order groups of objects	NPV-2
	Thursday	Order numbers	NPV-2
	Friday	Mini assessment	
13 07/12/2020		Consolidation week. Use this week to recap and consolidate learning from this term. For additional challenge – check out our problems of the day.	
14 14/12/2020		Activity week. This week we will be providing some themed activities linking to the learning from this term.	

Year 1 – Spring Term

Week	Day	Topic
1 04/01/2021		Consolidation week. Use this week to recap and consolidate learning from the Autumn term. For additional challenge – check out our problems of the day.
2 11/01/2021	Monday	Add by counting on within 20 activity
	Tuesday	Add by counting on within 20
	Wednesday	Add ones using number bonds activity
	Thursday	Add ones using number bonds
	Friday	Find and make number bonds to 20
3 18/01/2021	Monday	Add by making 10 activity
	Tuesday	Add by making 10
	Wednesday	Subtraction - not crossing 10
	Thursday	Subtraction - not crossing 10 (counting back)
	Friday	Subtraction - crossing 10 (counting back)
4 25/01/2021	Monday	Subtraction - crossing 10 (1)
	Tuesday	Subtraction - crossing 10 (2)
	Wednesday	Related facts
	Thursday	Compare number sentences
	Friday	Mini-assessment

Week	Day	Topic	
5 01/02/2021	Monday	Counting to 50 by making 10s activity	NPV-1
	Tuesday	Numbers to 50	NPV-1
	Wednesday	Counting forwards and backwards within 50	NPV-1
	Thursday	Tens and ones	NPV-1
	Friday	Represent numbers to 50	NPV-1
6 08/02/2021	Monday	One more one less activity	NPV-1
	Tuesday	One more one less	NPV-1
	Wednesday	Compare objects within 50	
	Thursday	Compare numbers within 50	
	Friday	Order numbers within 50	
7 22/02/2021	Monday	Count in 2s activity	NF-2
	Tuesday	Count in 2s	NF-2
	Wednesday	Count in 5s activity	NF-2
	Thursday	Count in 5s	NF-2
	Friday	Mini-assessment	
8 01/03/2021	Monday	Compare lengths activity	NPV-2
	Tuesday	Compare heights activity	NPV-2
	Wednesday	Compare lengths & heights	NPV-2
	Thursday	Measuring lengths (non-standard units) activity	NPV-2
	Friday	Measure length (1)	NPV-2
9 08/03/2021	Monday	Introducing the ruler activity	NPV-2
	Tuesday	Measure length (2)	NPV-2
	Wednesday	Adding length problems	AS-2
	Thursday	Subtracting length problems	AS-2
	Friday	Mini-assessment

	Wed	Hundreds	Count in 1000s
	Thu	Numbers to 1,000	Numbers to 1,000 (R)
	Fri	Numbers to 1,000 on a place value grid activity	Represent numbers to 10,000 activity
2 14/09/20	Mon	100s, 10s and 1s (1)	1000s 100s 10s and 1s
	Tue	100s, 10s and 1s (2)	Partitioning
	Wed	Number line to 100 (R)	Number line to 1,000 (R)
	Thu	Number line to 1,000	Number line to 10,000
	Fri	Find 1, 10, 100 more or less	Find 1, 10, 100 more or less (R)
3 21/09/20	Mon	Compare objects	Find 1,000 more or less
	Tue	Compare numbers	Compare 4-digit numbers
	Wed	Ordering numbers	Order numbers
	Thu	Count in 50s	Count in 25s
	Fri	Roman Numerals (Use Y4)	Roman Numerals
4 28/09/20	Mon	During this week, teachers may decide to recap previous place value content or teach Y4 content to all children. Year 3 will repeat this content next year in Year 4	Round to the nearest 10
	Tue		Round to the nearest 100
	Wed		Round to the nearest 1,000
	Thu		Introducing negative numbers activity
	Fri		Negative numbers

Year 3/4 – Autumn Term
Lesson by lesson overview 2020/21 — White Rose Maths

Week	Day	Y3 Topic	Y4 Topic
5 05/10/20	Mon	Add and subtract multiples of 100	Add and subtract multiples of 100 (R)
	Tue	Add and subtract 100s	Add and subtract 100s (R)
	Wed	Spot the pattern - making it explicit	Add and subtract 1s, 10s, 100s and 1,000s
	Thu	Add and subtract 3-digit and 1-digit numbers - not crossing 10	Add two 3-digit numbers - not crossing 10 or 100 (R)
	Fri	Add 3-digit and 1-digit numbers - crossing 10	Add two 4-digit numbers - no exchange
6 12/10/20	Mon	Add and subtract 3-digit and 2-digit numbers - not crossing 100	Add 3-digit and 2-digit- cross 100 (R)
	Tue	Add 3-digit and 2-digit - cross 100	Add two 3-digits cross 10 or 100 (R)
	Wed	Add 2-digit and 3-digit numbers - crossing 10 or 100	Add two 4-digit numbers - one exchange
	Thu	Add two 3-digit numbers - not crossing 10 or 100	Add two 4-digit numbers - more than one exchange
	Fri	Add two 3-digit numbers - crossing 10 or 100	Consolidation of addition
7 19/10/20	Mon	Subtract a 1-digit number from a 3-digit number - crossing 10	Subtract a 3-digit number from a 3-digit number - no exchange (R)
	Tue	Subtract a 2-digit from a 2-digit - crossing 10 (R)	Subtract two 4-digit numbers - no exchange
	Wed	Subtract a 2-digit number from a 3-digit number - crossing 100	Subtract a 3-digit number from a 3-digit number - exchange (R)
	Thu	Subtract a 2-digit number from a 3-digit number - crossing 10 or 100	Subtract two 4-digit numbers - one exchange
	Fri	Subtract a 3-digit number from a 3-digit number - no exchange	Subtract two 4-digit numbers - more than one exchange
8 02/11/20	Mon	Subtract a 3-digit number from a 3-digit number - exchange	Consolidation of subtraction
	Tue	Mixed addition and subtraction problems	Efficient Subtraction
	Wed	Estimate answers to calculations	Estimate answers
	Thu	Check answers	Checking strategies
	Fri	Mini-assessment	Mini-assessment

White Rose Maths

Week	Day	Y3 Topic	Y4 Topic
1 04/01/21	Mon	Consolidate 2, 4 and 8 times-tables	11 and 12 times-table
	Tue	Comparing statements	Multiply 3 numbers
	Wed	Related calculations	Factor pairs
	Thu	Multiply 2-digits by 1-digit - no exchange - activity	Efficient multiplication
	Fri	Multiply 2-digits by 1-digit (1)	Written methods
2 11/01/21	Mon	Multiply 2-digits by 1-digit - exchange - activity	Multiply 2-digits by 1-digit
	Tue	Multiply 2-digits by 1-digit (2)	Multiply 2-digits by 1-digit
	Wed	Scaling	Multiply 3-digits by 1-digit
	Thu	Divide 2-digits by 1-digit (1)	Divide 2-digits by 1-digit
	Fri	Divide 2-digits by 1-digit (2)	Divide 2-digits by 1-digit (1)
3 18/01/21	Mon	Divide 100 into 2, 4, 5 and 10 equal parts - activity	Divide 2-digits by 1-digit
	Tue	Divide with remainders activity	Divide 2-digits by 1-digit (2)
	Wed	Divide 2-digits by 1-digit (3)	Divide 3-digits by 1-digit
	Thu	How many ways?	Correspondence problems
	Fri	Mini-assessment	Mini-assessment
4 25/01/21	Mon	Equivalent lengths (m and cm)	Equivalent lengths (m and cm) (R)
	Tue	Equivalent lengths (mm and cm)	Equivalent lengths (mm and cm) (R)
	Wed	Measure length	Kilometres
	Thu	Measure length (m) (R)	What is area? Counting squares
	Fri	Compare lengths (R)	Making shapes

2.20 Fluency

The 2014 Maths Curriculum placed greater emphasis on the acquisition of all times tables' facts by the end of Year 4. As a result of this and the planned introduction of formal Times Table Testing during 2020 the opportunity has been taken to review approaches to the teaching of times tables and developing general fluency. Our daily sequenced curriculum specifies the teaching sequence of each aspect of mental recall of number facts including Times Tables and number bonds and the sequencing in reception encourages sound understanding from a very early start. However, as this scheme has only been in place for a relatively short period of time and the impact of periods of lockdown, we recognise that some children may not as yet be as fluent as they could be. To address this and further embed key facts into long term memory we have a daily 15 min Fluent In Five session which both revisits work already completed and also allows us to revisit key learning in order to be ready for our next topic.

As we know there is no easy shortcut to the acquisition of table knowledge although it is accepted that some children seem to pick up the facts more easily and some children are more willing to put in the extra effort at home in order to acquire those skills. Recent initiatives in school have sought to increase the profile of mental maths acquisition and include certificates of achievement in worship and inter class and inter team competitions on TT Rockstars. These initiatives have gone some way in driving up performance but now we need to take the next step and drive performance even further.

Our fluency approach includes:

- Weekly times tables' homework, supported by an appropriate test.
- TT Rockstars activities set weekly in Classes 2 upwards with continued competitions (perhaps allocated to one of the early morning slots).
- From the beginning of Year 4, fortnightly times table tests in line with the statutory tests.
- Daily Fluent in Five sessions which follow a prescribed pattern supplemented by a suggested focus for each of the half term by class (see overleaf).

The following pages identify a suggested sequence of teaching and suitable resources to use. Many experts still believe the chanting or singing of tables to be beneficial but also that the 2x table is the key table to learn properly as it is often the first one children are faced with and securing that is crucial to moving onto other tables together with all number bonds

Key Stage 1 – Fluency Plan

Half term	Reception	Year 1	Year 2
Autumn 1	Match & sort Comparing, more less Subitising 1,2 Counting to 10.	All bonds to 10 (including subtraction facts) Even & odd to 20 Doubling to 10. One more one less to 10 Counting forwards and backwards to 20	All bonds to 10 (including subtraction facts) Even & Odd to 50 Counting forwards and backwards to 50
Autumn 2	Subitising to 5 One more one less to 5 Composition to 3 Representation of numbers to 5.	All bonds to 10 (including subtraction facts) Even & odd to 20 Doubling to 10. One more one less to 20	All bonds to 200 (including subtraction facts) Count in 2's Count in 5's Count in 10's Count in 3's
Spring 1	Comparing numbers to 5. Composition of 4 & 5 (number bonds) Composition of 6,7 & 8 (number bonds)	All bonds to 10 (including subtraction facts) One more one less to 50 Count forwards backwards to 50	All bonds to 100 (tens only including subtraction facts) 2x table 5 x table 10 x table Count in 3's
Spring 2	Composition of 9 & 10 (number bonds) Comparing numbers to 10 All bonds to 10.	All bonds to 10 (including subtraction facts)	All bonds to 100 (tens and ones) Divide by 2 Divide by 5 Divide by 10
Summer 1	All bonds to 10 (including subtraction facts) Counting & recognition of numbers to 20	All bonds to 10 (including subtraction facts) Counting forwards and backwards to 50	All bonds to 100 (tens and ones) 2x table 5 x table 10 x table Count in 3's
Summer 2	All bonds to 10 (including subtraction facts) Even & odd to 20 Doubling to 10.	All bonds to 10 (including subtraction facts) Counting forwards and backwards to 100	All bonds Divide by 2 Divide by 5 Divide by 10

Key Stage 2 Fluency Plan

Half term	Year 3	Year 4	Year 5	Year 6
Autumn 1	Revise all addition and subtraction facts to 20 Review multiplication and division facts for 2x, 5x and 10x tables Count in multiples of 3 to 12x3 in order from 0 fluently.	Recall multiples of 3,4 and 8 up to 12x in any order, including missing numbers and related division facts fluently. Fluently count in 6's in order up to 12x6, using multiples of 3 to support. Know all number bonds for 100. Count in 25's and 1000's	Know decimal number bonds to 1 and 10 Recall multiples of 12 in any order, including missing numbers and related division facts fluently. Recall multiples of all times tables up to 12x12 in any order, including missing numbers and related division facts with growing fluency.	Know all previous number bonds including decimals Recall multiples of all times tables up to 12x12 in any order, including missing numbers and related division facts with growing fluency.
Autumn 2	Recall multiples of 3 up to 12x3 in any order, including missing numbers and related division facts with growing fluency. Count in multiples of 4 to 12x4 in order from 0 with growing fluency.	Recall multiples of 6 in any order, including missing numbers and related division facts with growing fluency. Fluently count in 7's in order up to 12x7.	Find factor pairs of a number Metric conversions	Identify common factors, including LCF and HCF Derive multiplication and division facts using decimal numbers
Spring 1	Know doubles and halves of all whole numbers to 20 Facts about time Recall multiples of 3 up to 12x3 in any order, including missing numbers and related division facts fluently. Count in multiples of 4 to 12x4 in order from 0 with fluently Count in multiples of 8 to 12x8 in order from 0 with growing fluency	Recall multiples of 6 in any order, including missing numbers and related division facts fluently. Recall multiples of 7 in any order, including missing numbers and related division facts with growing fluency 2 digit number bonds to 100	Identify prime numbers up to 20. Recall square numbers and square roots up to 144 Know the doubles and halves of all two-digit numbers	Identify prime numbers up to 50. Recall square numbers and square roots up to 15 x 15 Know doubles and halves of 2-digit decimals. Double and halves of all multiples of 10 to 10,000

Half term	Year 3	Year 4	Year 5	Year 6
Spring 2	Count in 50's and 100's Count in multiples of 8 to 12x8 in order from 0 with growing fluency	Know all pairs of multiples of 50 with a total of 1000. Recall multiples of 7 in any order, including missing numbers and related division facts fluently. Fluently count in 9's in order up to 12x9. Fluently count in 11's in order up to 12x11.	Know all pairs of factors of numbers up to 100.	Convert between fractions, decimals and percentages Find equivalence between fractions, decimals and percentages
Summer 1	Tell the time Know all addition and subtraction facts for multiples of 10 to 100 Count in multiples of 8 to 12x8 in order from 0 with growing fluency Recall multiples of 4 up to 12x4 in any order, including missing numbers and related division facts fluently.	Multiply and divide single digit numbers by 10 and 100	Know the decimal and percentage equivalents of the fractions $\frac{1}{2}$, $\frac{1}{4}$, $\frac{3}{4}$, ⅓, ⅔, tenths and fifths	Metric conversions
Summer 2	Multiply and divide 1 digit numbers by 10 Recall multiples of 4 up to 12x4 in any order, including missing numbers and related division facts fluently. Recall multiples of 8 up to 12x8 in any order, including missing numbers and related division facts with growing fluency	Know the decimal and percentage equivalents of the fractions $\frac{1}{2}$, $\frac{1}{4}$, $\frac{3}{4}$, ⅓, ⅔, tenths and fifths	Digital and analogue time equivalents	Revisit all fluency.

2.21 Calculation Policy

Our aim: To develop a curriculum which develops lively, enquiring minds encouraging pupils to become self-motivated, confident and capable in order to solve problems that will become an integral part of their future. Our Calculation Policy has been written in order to deliver the National Curriculum for mathematics which aims to ensure that all pupils:

- become fluent in the fundamentals of mathematics, including through varied and frequent practice with increasingly complex problems over time, so that pupils have conceptual understanding and are able to recall and apply their knowledge rapidly and accurately to problems
- reason mathematically by following a line of enquiry, conjecturing relationships and generalisations, and developing an argument, justification or proof using mathematical language
- can solve problems by applying their mathematics to a variety of routine and non-routine problems with increasing sophistication, including breaking down problems into a series of simpler steps and persevering in seeking solutions.

Our calculation policy incorporates the concept of Concrete, Pictorial, Abstract (CPA) which is a highly effective approach to teaching that develops a deep and sustainable understanding of maths in pupils and involves use of a number of manipulatives to support understanding and enables learners to demonstrate conceptual variation where mathematical concepts are displayed in a variety of ways. Use of manipulatives to be used at all stages of learning can be found in the following pages. Specific details of what is taught in each year group can be found in the Progression Maps by area, however where a child requires additional time on one approach this should be encouraged.

Our sequence of teaching enables us to revisit topics regularly and to build on prior learning. With this in mind, and to ensure learning is completely embedded and understood, it is recommended that learning should always start with an opportunity to demonstrate the Concrete method, although it is recognised that older children may not need to spend the same amount of time on the Concrete stage as younger ones. Use the opportunity to evidence this learning by taking photos and including them in Maths books.
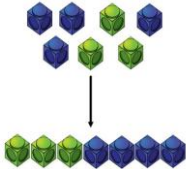

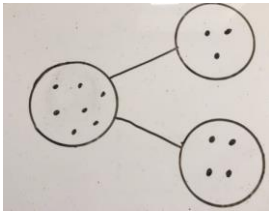

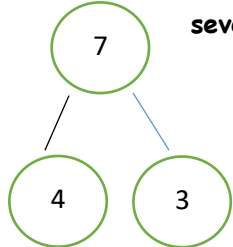

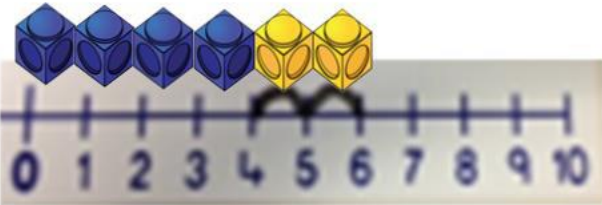

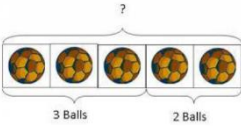

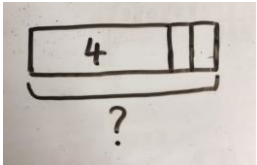

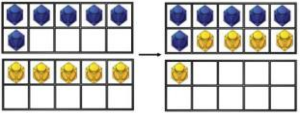

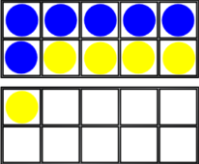

Although you must of course meet the needs of your class both ways and if you think they are ready for, e.g. Abstract earlier or need Concrete later than so be it and of course it is assumed that once this approach is embedded then as children are familiar with the concept then as children move through school less time will be spent on Concrete and more on Abstract and beyond.

Hanging Heaton C of E (VC) J & I School - Use of manipulatives
	EYFS/Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Addition	Combining two parts to make a whole: part whole model. Starting at the bigger number and counting on- using cubes or pegs on coat hangers. Regrouping to make 10 using ten frame.	Adding three single digits. Use of base 10 to combine two numbers.	Column method-regrouping. Using place value counters (up to 3 digits).	Column method-regrouping. (up to 4 digits)	Column method-regrouping. Use of place value counters for adding decimals.	Column method-regrouping. Abstract methods. Place value counters to be used for adding decimal numbers.
Subtraction	Taking away ones Counting back Find the difference Part whole model Make 10 using the ten frame	Counting back Find the difference – counting on using a number line. Part whole model Make 10 Use of base 10	Column method with regrouping. (up to 3 digits using place value counters)	Column method with regrouping. (up to 4 digits)	Column method with regrouping. Abstract for whole numbers. Start with place value counters for decimals	Column method with regrouping. Abstract methods. Place value counters for decimals- with different amounts of decimal places.
Multiplication	Recognising and making equal groups. Doubling Counting in multiples Use cubes and other objects in the classroom	Arrays- showing commutative multiplication	Arrays 2d × 1d using base 10 Grid method	Column multiplication-introduced with place value counters. (2 and 3 digit multiplied by 1 digit) Grid method	Column multiplication Abstract only but might need a repeat of year 4 first(up to 4 digit numbers multiplied by 1 or 2 digits)	Column
Division	Sharing objects into groups Division as grouping e.g. I have 12 sweets and put them in groups of 3, how many groups? Use cubes and draw round 3 cubes at a time.	Division as grouping Division within arrays- linking to multiplication Repeated subtraction	Division with a remainder-using lollipop sticks, times tables facts and repeated subtraction. 2d divided by 1d using base 10 or place value counters	Division with a remainder Short division (up to 3 digits by 1 digit-concrete and pictorial)	Short division (up to 4 digits by a 1 digit number including remainders)	Short division Long division with place value counters (up to 4 digits by a 2 digit number) Children should exchange into the tenths and hundredths column too

Calculation policy: Addition
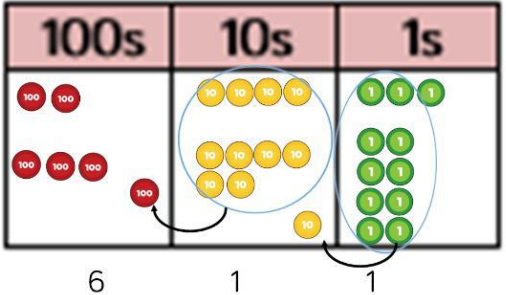

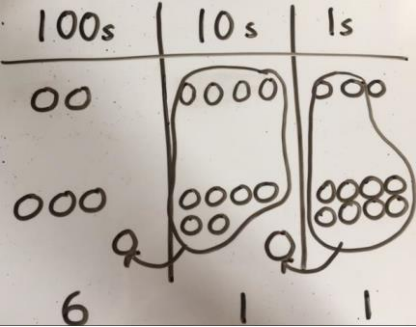

Key language: sum, total, parts and wholes, plus, add, altogether, more, 'is equal to' 'is the same as'.

Concrete	Pictorial	Abstract
Combining two parts to make a whole (use other resources too e.g. eggs, shells, teddy bears, cars).	Children to represent the cubes using dots or crosses. They could put each part on a part whole model too.	4 + 3 = 7 Four is a part, 3 is a part and the whole is seven.
Counting on using number lines using cubes. Or use pegs on a coat hanger.	A bar model which encourages the children to count on, rather than count all. Or use a numberline start at the larger number on the number line and count on in ones or in one jump to find the answer. Develop to counting on in H's T's and U's 543+243 = 543 + 200 + 40 + 3	The abstract number line: What is 2 more than 4? What is the sum of 2 and 4? What is the total of 4 and 2? 4 + 2 Place the larger number in your head & count on the smaller number to find your answer.
Regrouping to make 10; using ten frames and counters/cubes. 6 + 5	Children to draw the ten frame and counters/cubes.	Children to develop an understanding of equality e.g. 6 + □ = 11 6 + 5 = 5 + □ 6 + 5 = □ + 4
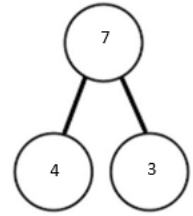

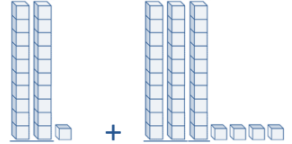

Addition

Concrete	Pictorial	Abstract
TO + O using base 10. Continue to develop understanding of partitioning and place value. 41 + 8 	Children to represent the base 10 e.g. lines for tens and dot/crosses for ones. 	 41 + 8 1 + 8 = 9 40 + 9 = 49
TO + TO using base 10. Continue to develop understanding of partitioning and place value. 36 + 25 	Children to represent the base 10 in a place value chart. 	Looking for ways to make 10. 36 + 25= 1 5 30 + 20 = 50 5 + 5 = 10 50 + 10 + 1 = 61 $\begin{array}{r} 36 \\ +25 \\ \hline 61 \\ \hline {\scriptstyle 1} \end{array}$ Formal method:

Addition
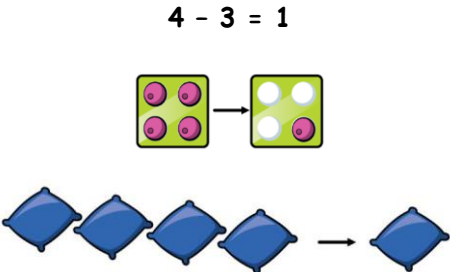

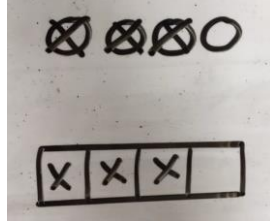

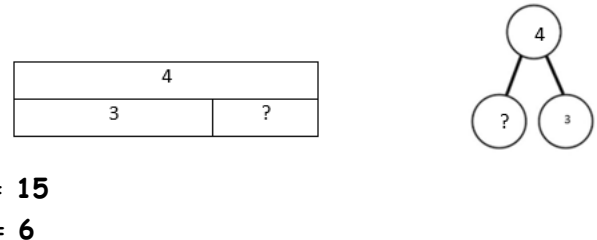

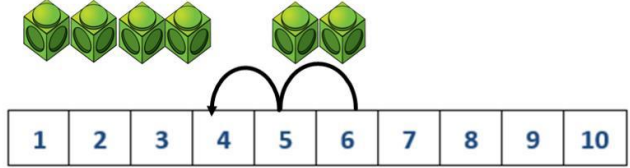

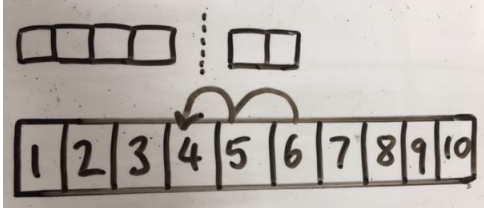

Concrete	Pictorial	Abstract
Use of place value counters to add HTO + TO, HTO + HTO etc. When there are 10 ones in the 1s column- we exchange for 1 ten, when there are 10 tens in the 10s column- we exchange for 1 hundred.	Children to represent the counters in a place value chart, circling when they make an exchange.	$$\begin{array}{r} 243 \\ +368 \\ \hline 6\ 11 \\ \hline \small{1\ \ 1} \end{array}$$ Start by partitioning the numbers before moving on to clearly show the exchange below the addition. $$\begin{array}{rcl} 20 & + & 5 \\ 40 & + & 8 \\ \hline 60 & + & 13 = 73 \end{array}$$ As the children move on, introduce decimals with the same number of decimal places and different. Money can be used here. 72.8 +54.6 127.4 1 1 $$\begin{array}{r} 2\ 3\ .\ 3\ 6\ 1 \\ 9\ .\ 0\ 8\ \textbf{0} \\ 5\ 9\ .\ 7\ 7\ \textbf{0} \\ +\ 1\ .\ 3\ \textbf{0}\ \textbf{0} \\ \hline 9\ 3\ .\ 5\ 1\ 1 \\ \small{2\ 1\ \ \ 2} \end{array}$$ $$\begin{array}{r} £\ 2\ 3\ .\ 5\ 9 \\ +\ £\ \ \ 7\ .\ 5\ 5 \\ \hline £\ 3\ 1\ .\ 1\ 4 \\ \small{1\ 1\ \ \ \ 1} \end{array}$$

Conceptual variation; different ways to ask children to solve 21 + 34
	Word problems: In year 3, there are 21 children and in year 4, there are 34 children. How many children in total? 21 + 34 = 55. Prove it	$$\begin{array}{r} 21 \\ +34 \\ \hline \end{array}$$ 21 + 34 = = 21 + 34 Calculate the sum of twenty-one and thirty-four.	Missing digit problems:

Calculation policy: Subtraction
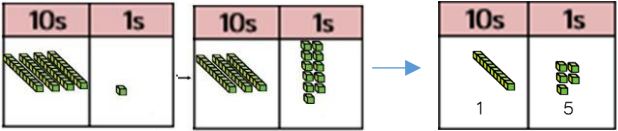

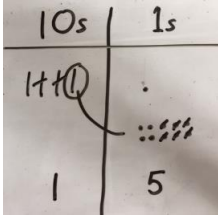

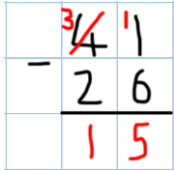

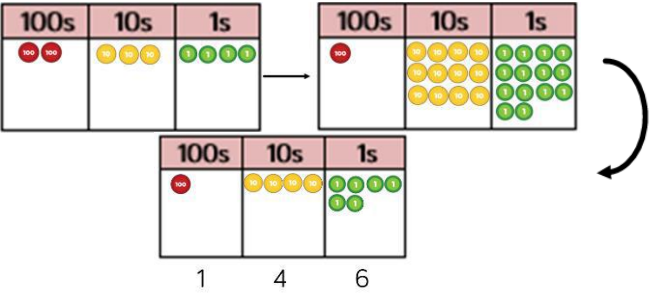

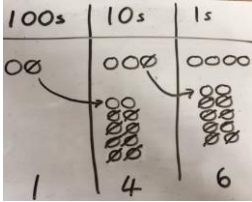

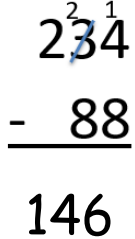

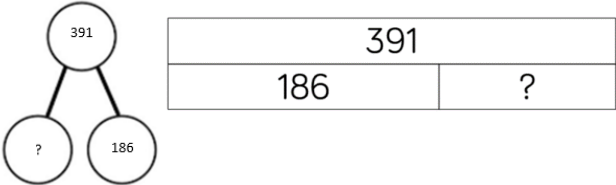

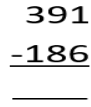

Key language: take away, less than, the difference, subtract, minus, fewer, decrease.

Concrete	Pictorial	Abstract
Physically taking away and removing objects from a whole (ten frames, cubes and other items such as beanbags could be used). 4 – 3 = 1 	Children to draw the concrete resources they are using and cross out the correct amount. The bar model can also be used. 	4- 3 =? ? = 4 – 3 18 -3= 15 8 – 2 = 6
Counting back (using number lines, number tracks, or pegs on coat hangers) children start with 6 and count back 2. 6 – 2 = 	 Children to represent what they see pictorially	Put 13 in your head, count back 4. What number are you at? Use your fingers to help. Children to represent the calculation on a number line or number track and show their jumps. Encourage children to use an empty number line

Subtraction
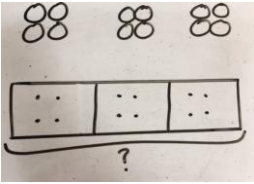

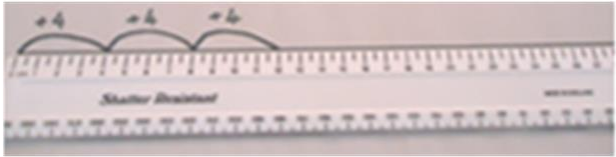

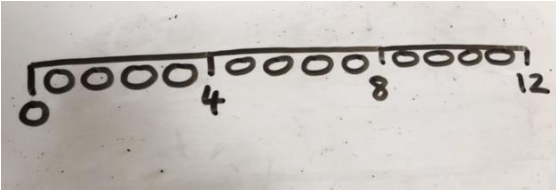

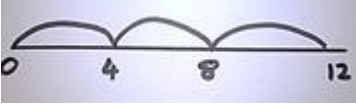

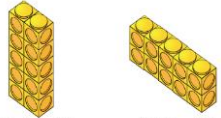

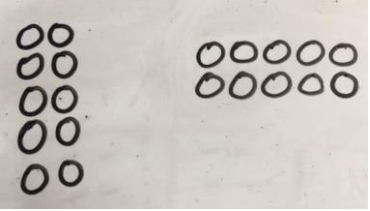

Concrete	Pictorial	Abstract
Finding the difference (using cubes or Base 10, other objects can also be used).	Children to draw the cubes/other concrete objects which they have used or use the bar model to illustrate what they need to calculate. Count on to find the difference.	Find the difference between 8 and 5. 8 – 5, the difference is ? Children to explore why 9 - 6 = 8 – 5 = 7 – 4 have the same difference. Hannah has 23 sandwiches, Helen has 15 sandwiches. Find the difference between the numbers of sandwiches.
Missing number calculations. Use the part whole model to help explain the inverse between addition and subtraction.	If 15 is the whole and 7 is one of the parts. What is the other part? 15 - 7 = Using a drawn PPW with marks in it	
Making 10 using ten frames. 14 – 5	Children to present the ten frame pictorially and discuss what they did to make 10.	Children to show how they can make 10 by partitioning the subtrahend. 14 - 5 = 9 4 1 14-4= 10 10 – 1 = 9
Column method using base 10. 48-7 =	Children to represent the base 10 pictorially.	Column method or children could count back 7.

Subtraction
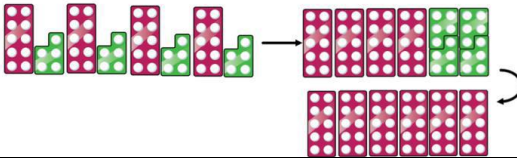

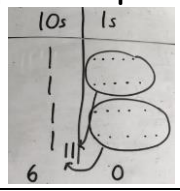

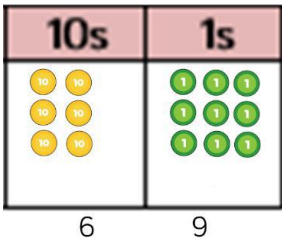

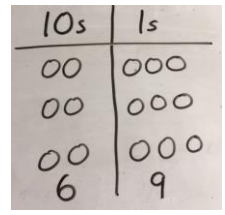

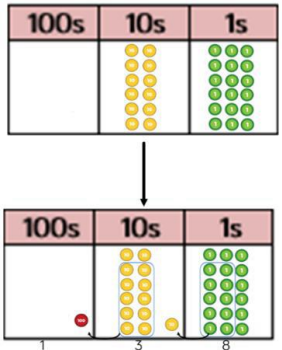

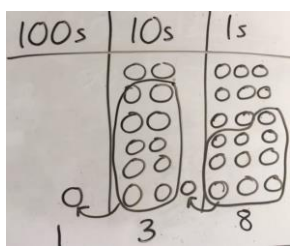

Concrete	Pictorial	Abstract
Column method using base 10 and having to exchange. - 41 – 26 =	Represent the base 10 pictorially, remembering to show the exchange.	Formal column method. Children must understand that when they have exchanged the 10 they still have 41 because 41 = 30 + 11.
Column method using place value counters. 234 – 88=	Represent the place value counters pictorially; remembering to show what has been exchanged.	Formal column method. Children must understand what has happened when they have crossed out digits. $$2\overset{2}{\cancel{3}}\overset{1}{4}$$ $$-\ \ 88$$ $$146$$

Conceptual variation; different ways to ask children to solve 391 - 186

	Raj spent £391, Timmy spent £186. How much more did Raj spend? Calculate the difference between 391 and 186.	? – 391 = 186 What is 186 less than 391? 391 -186 ———	Missing digit calculations

Calculation policy: Multiplication

Key language: double, times, multiplied by, the product of, groups of, lots of, equal groups.

Concrete	Pictorial	Abstract
Repeated grouping/repeated addition 3 × 4 4 + 4 + 4 **There are 3 equal groups, with 4 in each group.** 	**Children to represent the practical resources in a picture and use a bar model.** 	3 × 4 = 12 4 + 4 + 4 = 12
Number lines to show repeated groups- 3 × 4 	**Represent this pictorially alongside a number line e.g.:** 	Abstract number line showing three jumps of four. 3 × 4 = 12
Use arrays to illustrate commutativity counters and other objects can also be used. 2 × 5 = 5 × 2 2 lots of 5 5 lots of 2	**Children to represent the arrays pictorially.** 	Children to be able to use an array to write a range of calculations e.g. 10 = 2 × 5 5 × 2 = 10 2 + 2 + 2 + 2 + 2 = 10 10 = 5 + 5

Multiplication

Concrete	Pictorial	Abstract
Partition to multiply using base 10 $4 \times 15 =$ 	Children to represent the concrete manipulatives pictorially. 	4×15 10 5 Children to be encouraged to show the steps they have taken. A number line can also be used $10 \times 4 = 40$ $5 \times 4 = 20$ $40 + 20 = 60$
Formal column method with place value counters (base 10 can also be used.) 3×23 	Children to represent the counters pictorially. 	Children to record what it is they are doing to show understanding by grid method With this: $23 \times 3 = 69$ | X	20	3
3	60	9 | $60 + 9 = 69$
Formal column method with place value counters. 6×23 	Children to represent the counters/base 10, pictorially e.g. the image below. 	Formal written method $6 \times 23 =$ $$\begin{array}{r} 23 \\ \times\ 6 \\ \hline 138 \\ \hline 1\ 1 \end{array}$$

Multiplication
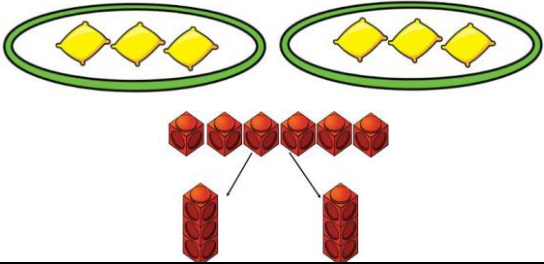

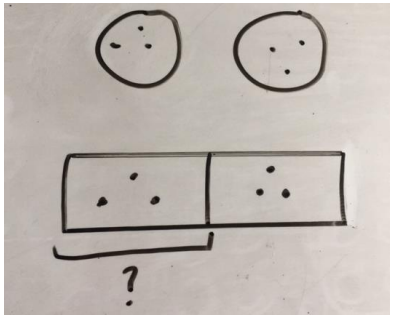

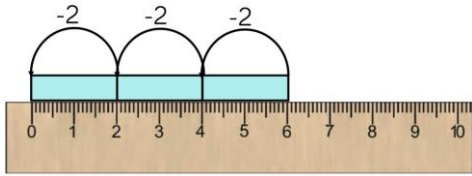

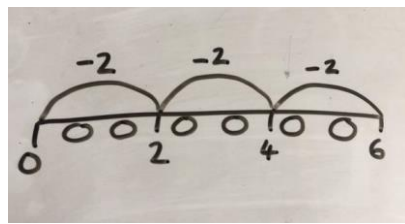

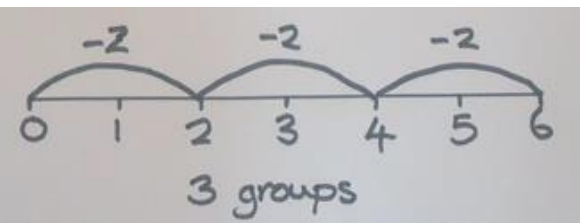

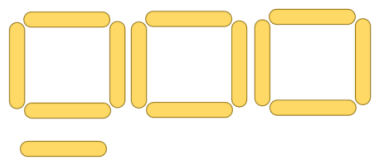

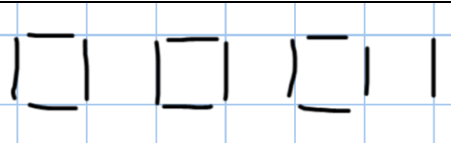

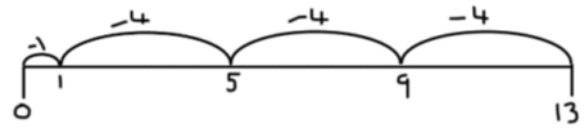

Concrete	Pictorial	Abstract
When children start to multiply 3d × 3d and 4d × 2d etc., they should be confident with the abstract: To get 744 children have solved 6 × 124. To get 2480 they have solved 20 × 124.		$$\begin{array}{ccc} & 1 & 2 & 4 \\ \times & & 2 & 6 \\ \hline & _{\tiny 1}7 & _{\tiny 2}4 & 4 \\ 2 & ^{-}4 & 8 & 0 \\ \hline 3 & 2 & 2 & 4 \\ & _{\tiny 1} & _{\tiny 1} \end{array}$$ Answer: 3224

Conceptual variation; different ways to ask children to solve 6 × 23			
23 23 23 23 23 23 ?	Mai had to swim 23 lengths, 6 times a week. How many lengths did she swim in one week? With the counters, prove that 6 × 23 = 138	Find the product of 6 and 23 6 × 23 = ? = 6 × 23 $$\begin{array}{r} 6 \\ \times\ 23 \\ \hline \end{array} \qquad \begin{array}{r} 23 \\ \times\ 6 \\ \hline \end{array}$$	What is the calculation? What is the product?
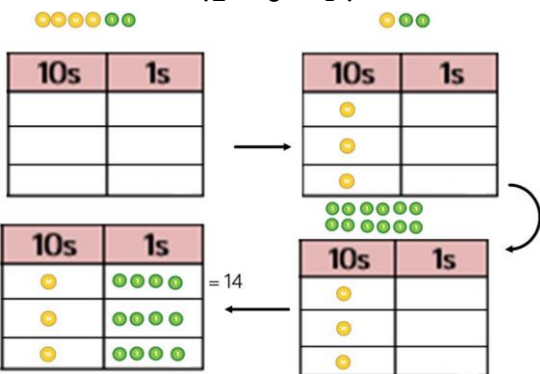

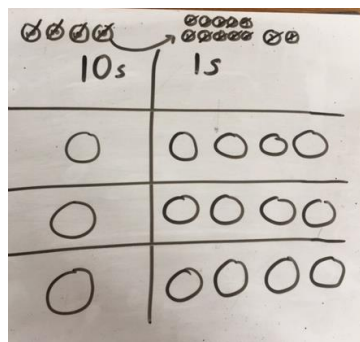

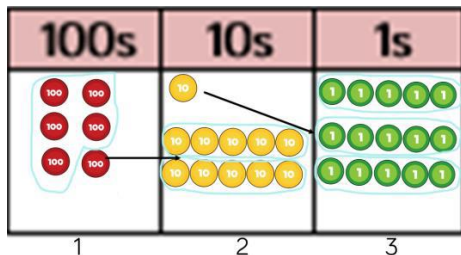

Calculation policy: Division

Key language: share, group, divide, divided by, half.

Concrete	Pictorial	Abstract
Sharing using a range of objects. **6 ÷ 2**	**Represent the sharing pictorially.**	6 ÷ 2 = 3 Children should also be encouraged to use their 2 times table's facts.
Repeated subtraction using base 10 or cubes above a ruler. 6 ÷ 2 3 groups of 2	**Children to represent repeated subtraction pictorially.**	Abstract number line to represent the equal groups that have been subtracted. 3 groups
2d ÷ 1d with remainders using lollipop sticks. **13 ÷ 4** **Use of lollipop sticks to form wholes- squares are made because we are dividing by 4.** **There are 3 whole squares, with 1 left over.**	 **Children to represent the lollipop sticks pictorially.** **There are 3 whole squares, with 1 left over.**	13 ÷ 4 – 3 remainder 1 Children should be encouraged to use their times table facts; they could also represent repeated addition on a number line '3 groups of 4, with 1 left over'

Division

Concrete	Pictorial	Abstract
Sharing using place value counters. $42 \div 3 = 14$ 	Children to represent the place value counters pictorially. 	Children to be able to make sense of the place value counters and write calculations to show the process. $42 \div 3$ $42 = 30 + 12$ $30 \div 3 = 10$ $12 \div 3 = 4$ $10 + 4 = 14$
Short division using place value counters to group. $615 \div 5$ 1. Make 615 with place value counters. 2. How many groups of 5 hundreds can you make with 6 hundred counters? 3. Exchange 1 hundred for 10 tens. 4. How many groups of 5 tens can you make with 11 ten counters? 5. Exchange 1 ten for 10 ones. 6. How many groups of 5 ones can you make with 15 ones?	Represent the place value counters pictorially. 	Children to the calculation using the short division scaffold.

Division

| Concrete	Pictorial	Abstract

Long division using place value counters - 2544 ÷ 12	We can't group 2 thousands into groups of 12 so will exchange them.
	
	  We can group 24 hundreds into groups of 12 which leaves with 1 hundred.
	
	  After exchanging the hundred, we have 14 tens. We can group 12 tens into a group of 12, which leaves 2 tens.
	
	  After exchanging the 2 tens, we have 24 ones. We can group 24 ones into 2 group of 12, which leaves no remainder.	

Conceptual variation; different ways to ask children to solve 615 ÷ 5

Using the part whole model below, how can you divide 615 by 5 without using short division?	I have £615 and share it equally between 5 bank accounts. How much will be in each account? 615 pupils need to be put into 5 groups. How many will be in each group?	5⟌615 615 ÷ 5 = = 615 ÷ 5	What is the calculation? What is the answer?
