

# Hanging Heaton CE (VC) J&I School

Art & Design Day

8th July 2021

Let all that you do be done in LOVE - 1 Corinthians 16:14

We aim to develop our children socially, morally, culturally and spiritually to help them to be more valued and responsible citizens.

On 8th July 2021, the whole school took part in an Art and Design day. We investigated the question "How might we use art and design to promote a healthy environment and a peaceful, sustainable world?" We based all our creative work on the environmental problems we have in our world.

In the morning, we all created an image with an important message behind it, we have displayed these pieces of work in a large, class sketch book to look back on in the future. In the afternoon, we used recycled bottles and nature to create bug hotels, bird feeders, environmental art and bottle fish.

We all had a fabulous day as you can see from our reports from each class.

## Class 1

In class we had a wonderful time learning about animals in their habitats. We drew pictures of where animals live in the wild and talked about what was happening to habitats due to environmental issues. We then went on a nature hunt and used recycled plastic bottles and made our very own Bug Hotels! We hope the little insects love their new homes.

## Class 2

In Class 2 we had a brilliant day not only producing fantastic art and design work but also learning all about the world and what we can do to help save our planet. We used our artistic skills to draw images of what our world should look like and we used recycled plastic bottles to make bird feeders.

### Class 3

In Class 3 we started the day by looking at the negative impact humans are having on our planet. We then created work showing what environmental impact we are having and wrote about why we need to stop.

### Class 4

In class 4 we started our day by thinking about recycling and then went outside to create our own pictures using items we found outside. After this we thought about the negative human impact on the planet and what we can do about it. To show this we drew self portraits with thought bubbles to show what we think is wrong with the world and then one with what we would like the world to be like. We had lots of fun, we enjoyed learning to draw faces and working together to create a picture.

### Class 5

In class 5, we discussed what saving the planet meant and the effects of unused plastic on our planet. We each created a page for a book drawing a simple image but one with a powerful message behind it. During the afternoon, we researched facts about pollution in the oceans and current statistics for the amount of pollution and endangered sea animals. Using a plastic bottle, we made a fish filled with various bits of litter.
